

The design philosophy of our entire product line comes from 25 years of crafting tents and bedrolls to meet the needs of many outdoor enthusiasts. From working ranch cowboys to back country outfitters, I have learned the optimal tent must meet 4 requirements: **comfort, durability, practicality, and easy to transport.**

Why should you buy a canvas tent?

Whether you have a “lower forty”, a secret camp spot or a vacant lot, a canvas tent will not tear up your land; but it will continuously build your soul’s enjoyment.

Why should you buy a bedroll?

Discover what Australians have used in the outback for years. Keeps your sleeping bag clean and dry.

Why should you buy an ELLIS Canvas Tent or Bedroll?

We’re fabricators. It’s not just the design of the tent or bedroll, but how it is sewn together that makes it great. We are a small shop, and it’s important to us to pay attention to detail. It also enables us to upgrade our products as needed.

Ellis Bedrolls

Original Cavalry, Zippered Cavalry, Rocky Mountain Swag

**Zippered Cavalry Bedroll
Regular with foam pad**

**Rocky Mountain Swag
Regular without foam pad**

A bedroll is a storage system for a sleeping bag and pad. When it is rolled up in a compact bundle it is easy to carry. When laid out, it is a warm, comfortable, clean and dry place to sleep.

All bedrolls are constructed with our stock mineral dyed, khaki colored 12.63 oz. Sunforger army duck. All come with a sewn-in sleeping pad envelope. The Original comes only in regular size. The Zippered Cavalry and the Rocky Mountain Swag come in 2 sizes: Regular and Large.

Regular Size: measures 34" wide and 80" long, with 9" sides.

Large Size: measures 45" wide and 80" long, with 9" sides.

The foam pad measures 31" wide, 72" long, and 3" thick, fills the bedroll liner nicely, and guarantees comfortable sleeping on hard ground.

With our convoluted foam pad, the Regular size has plenty of room for an average size man. The Large size is comfortable for a large man and even for a slim couple. Without a pad, the sleeping space is even bigger. The head flap is 40" long and can be tied over the top half of the bedroll for protection. With proper drainage, you can sleep dry in a rain storm.

The Original Cavalry Bedroll

The original design of the Cavalry Bedroll was developed 20 years ago at David Ellis Canvas Products. This version provides extra protection in severe weather. It has two flaps that overlap in opposite directions and are secured with easy to adjust nylon cords. This style only comes in the Regular size.

Original Cavalry

Size	Price/Weight	
	Regular	
No Foam	\$260/12 lbs	
With Foam	\$313/16 lbs	
No Foam w/Sleeping Bag	\$357/17 lbs	
Foam w/Sleeping Bag	\$400/22 lbs	

The Zippered Cavalry Bedroll

The Zippered cavalry bedroll is our most popular bedroll. The large zippers sewn down each side makes it very easy to get in and out of the bedroll. Sewn in ties at the bottom of the bedroll secure the sleeping bag from sliding out.

Zippered Cavalry

Size	Price/Weight		
	Regular	Large	
No Foam	\$194/10 lbs	\$230/11 lbs	
With Foam	\$245/15 lbs	\$281/16 lbs	
No Foam w/Sleeping Bag	\$289/16 lbs	\$325/17 lbs	
Foam w/Sleeping Bag	\$332/21 lbs	\$368/22 lbs	

The Rocky Mountain Swag

This is an option that conceals your bedding with a single double directional zipper up the sides and over the top. This design is inspired by a need for packers who want to keep their bedding clean when the bedroll was left out in the open. We have perfected the design and made some changes: the envelope that receives the foam pad opens at the top of the bedroll rather than at the bottom. This allows you to insert a Thermarest sleeping pad after you roll it out, and carry the pad separate from the bedroll.

If used with a self inflating sleeping pad you can now access the air nozzle, which is critical when deflating. There is also a vent at the top boxing so you can zip the body flap over your head and be completely contained; keeping critters from getting in and letting moisture out. Ties are sewn at the bottom and top of the bedroll to allow for tying in custom bedding.

Rocky Mountain Swag

Size	Price/Weight		
	Regular	Large	
No Foam	\$231/11 lbs	\$243/11 lbs	
With Foam	\$283/15 lbs	\$295/16 lbs	
No Foam w/Sleeping Bag	\$327/16 lbs	\$339/17 lbs	
Foam w/Sleeping Bag	\$370/21 lbs	\$382/22 lbs	

Custom widths are available without foam pad.

We Make The Cowboy Teepee In Three Variations and Three Sizes:

**The Working
Cowboy Teepee**
(8'x8')

The Range Tent
(12'x12')

The Prairie Tent
(the whole enchilada)
(10'x10')

Features of The Cowboy Teepees:

- Fully sewn-in floor.
- This is a pyramid style tent with a tall 3-way zippered door.
- Typical set- up requires 4 spikes, A-frame or single pole.
- Large D-rings on the corners, smaller D-rings on 3 sides and a nylon loop and O-ring at the top. All tents come with lantern hooks.
- Without the poles the tent comes with only a standard storage bag and no stakes.
- With poles: you get a 10-piece aluminum A-frame pole set with a pole bag, 12" stakes, and a compression bag. The compression bag holds the tent and all accessories in a tight package.
- Tent fly: A polyethylene fly is recommended if you plan to use your tent in snowy weather. The fly covers the entire A-frame creating a temperature regulating air space. The fly can also be ordered with or without poles.
- Stove jacks are an additional option for the tent and the fly.

The Working Cowboy Teepee

This tent design has been a staple at David Ellis Canvas Products since 1996. A basic tent without the hassle of guy lines makes for a quick set up. Constructed of tough and mildew resistant, lighter in weight, shrink proof 7oz. canvas, our Working Cowboy Teepee has proven to be a great work tent. It has a screen door and a small, head-level window.

Working Cowboy Teepee

	Price/Weight		
Size	8'x8'	10'x10'	12'x12'
No Poles	\$459/15 lbs	\$573/21 lbs	\$714/28 lbs
With Poles	\$729/19 lbs	\$884/32 lbs	\$1038/43 lbs
Occupancy	sleeps 1	sleeps 2	sleeps 3

10' x 10' shown

The Range Tent

A favorite tent for working cowboys, also without guy lines, the back window is larger and lower than the Working Cowboy Tepee. A vent is placed high, and our exclusive zip away awning shades the front door. During hot days these features are surprisingly popular on ranches in the Southwest. The Range Tent has a screen door, larger low window, high vent and an awning with a zipper down the center seam. When it is zipped closed, a pole and guy line support the awning, providing shade and protection from rain. When the zipper is open, the awning ties off to either side of the door.

Range Tent

Size	Price/Weight		
	8'x8'	10'x10'	12'x12'
No Poles	\$580/17 lbs	\$701/26 lbs	\$857/30 lbs
With Poles	\$892/28 lbs	\$1064/36 lbs	\$1233/45 lbs
Occupancy	sleeps 1	sleeps 2	sleeps 3

The Prairie Tent

This is our most popular Cowboy Tepee. Its shaded low back window, protected front screen door, and high vent makes it a great tent for the summertime. With the use of 2 guy lines, the actual footprint of each size tent has more usable space. The extra large window is positioned low on the vertical back wall and sheltered by the awning above. This allows the window to remain open during a rain storm. The 3- way zippered door leans out at a 20-degree angle, and with an additional 12" awning, it creates a large protected area in front of the tent. If you're considering the 12' Range Tent for the extra room, the 10' Prairie Tent may also work for you.

We like to think of the Prairie Tent as the *whole enchilada!*

Prairie Tent

The Torrent Tent

The Torrent is easily set up by one person...the hardest part is driving 8 spikes! It is a versatile tent that works well in extreme weather from deserts to mountains. The design is derived from a tent known as the "Bell Tent." This was the preferred tent of European invaders, early North Country explorers, and woodsmen, providing a worthy storm shelter that was quick to set up with minimal poles and used long guy lines to support the side walls.

Our Torrent Tent is rectangular and provides a better use of space than the old round design. It gathers its strength from the unique tension on the roof, and the use of three poles instead of two. In re-engineering the design, we have found that the taller mid-walls and lower corners are a pivotal factor. Once the guy lines are secured to these spikes, the poles are installed and guy lines can be tensioned quickly, even in high winds. With its elevated mid section, and lean-out walls, the Torrent Tent creates a big livable space inside.

The Torrent's unique design supports a wide range of uses. The doors provide typical screening in the front and back of the tent, and has a screened window for inside accessible ventilation, however, a back wall with a large window may be your preference.

Preferences:

- Floor or no floor. Dave specifically designed this tent to receive a fully sewn-in floor, or no floor at all; no compromise to its durability. The no floor, or removable floor option is most requested when it is used in cold weather and heated with a wood stove. The fully sewn-in floor version may be your preference when buggy summer time camping is your style.
- Without poles, the tent comes with only a standard storage bag and no stakes.
- With poles, you get 3 stackable pole sets in a 24" pole bag, 16 stakes, and a compression bag. The compression bag holds the tent and all accessories in a tight package.
- Tent fly: the polyethylene fly is recommended for winter camping. The fly covers the entire tent and is lifted up with 2 poles on both sides of the door. You can order it with or without poles.
- Stove jacks are an additional option for the tent and the fly.
- Back wall window or back door.

Distinguishing features:

- All Torrent tents have a 9" vinyl base around the perimeter of the tent that will not rot or shrink.
- The side wall is 24" off the ground at the corner of the tent and rises to 38" tall in the center of the side wall. On some occasions when even greater stability is desired, an additional support can be used at the mid side wall... but NOT in the corners.
- **Size Options:** 8' x 10' | 10' x 12' | 12' x 14'
- Side walls accommodate sleeping cots nicely.

Torrent Tent w/sewn in floor

Size	Price/Weight		
	8'x10'	10'x12'	12'x14'
No Poles	\$1047/38 lbs	\$1190/44 lbs	\$1466/51 lbs

Historic Tent Shelters

Made with our **exclusive** 7oz. canvas

The Whelen Lean-To

Here's the classic canoe tent lean-to. The design body is 6' X 8' and closely matches old Whelen designs in Historical drawings.

The Woodsman Tarp

(sometimes all you need is a good tarp)

This 9'8" X 12'8" canvas tarp has all the right tie points to make several Teepee tent configurations. With the reinforced corners loops, and extra side loops installed on the middle seam makes the tarp into a great fly as well.

The Floorless Teepee

(A pyramid tent)

This tent is our basic range tent/cowboy teepee, without a floor. It has a 12" sod cloth, zipper/tie door, and no threshold. It sets up with a single pole or A-frame. A fitted floor is available and a stove jack can also be installed. We sell it with all our Range Tent options; and believe it or not they make nice additions to this simple tent. Only 8' X 8' and 10' X 10' are available.

The Shackleton

Our new Shackleton Tent is basically a square Torrent Tent and is the inspiration behind it. The Historical Shackleton Tent was a single pole square teepee with several side poles holding up 4 vertical walls. This recent interpretation of the Shackleton is also a square single pole tent, but with a raised door entry. Side and back walls are vertical without the need for any poles. "It's a beautiful thing!" With or without a floor, the ideal stove location is in the center, allowing for even distribution of its heat. The two sizes available are 8' X 8' and 11' X 11'. The Shackleton comes with two windows, screen door, vent and stove jack. It is priced with or without poles.
