

## **E3 Duo™ International Etch Kit Information**

### **Copper Sulfate**

Your E3 Duo™ Etch kit is complete, with the exception of the copper sulfate (cupric sulfate). Shipping regulations do not permit us to ship this product overseas. Copper Sulfate is commonly used to keep taproots from invading pipes underground. It is also used for garden and agricultural purposes. It can be purchased at home hardware or garden supply stores. It is commonly sold as a “root kill” product. It is also used for laboratory purposes and can be purchased from scientific or chemistry supply shops.

### **International Multi Plug**

Your kit contains an international multi plug, which is suitable for use from 100 – 240VAC.
