

BAJARACK WARRANTY

This Limited Warranty covers BajaRack products and all accessories for a period of 2 years from the date of purchase to the original owner of the product and does not apply once the equipment is sold or transferred to another person.

This Warranty does not cover the cost of removal of reinstallation or the product. BajaRack warrants (subject to conditions listed in this warranty) all products to be free of manufacturing defects in materials and workmanship.

Warranty claim requirements

The claim has to be submitted during the warranty period at the place of purchase or directly at our corporate office located:

BajaRack Adventure Equipment
2275 Michael Faraday Drive, Suite 6
San Diego, CA 92154 USA
Phone Number: 760-621-0171

On your product you will find a label with a serial number. If you remove this label, please save the serial number in a safe place. You will need it if you want to make a warranty claim in the future. Any cost incurred to transport the defective product "to and from" will be the customer's responsibility.

Warranty resolution

Subject to BajaRack inspection of the product, the company will remedy defects in materials and/or workmanship by repairing or replacing, at BajaRack's option, the defective product without charge for parts or labor, subject to the limitations and exclusions described in this warranty. BajaRack may elect, at its option, not to repair or replace a defective product, in which case BajaRack will issue to the original retail purchaser, at BajaRack's option, either a full refund equal to the purchase price paid for the product, or a credit to be used toward the purchase of new BajaRack products or accessories.

Limitations of Liability

BajaRack is not liable for damage caused by shipping or transport of BajaRack products. It is the responsibility of the original retail purchaser to inspect all products prior to acceptance and to notify the shipping carrier in a timely manner so that any claim for damages can be made. If timely notification to the shipping carrier by the original retail purchaser is not made regarding damage caused during the transport of the product, a claim for damages may not be possible, and all liability falls to the original retail purchaser. This warranty does not apply if accident, abuse, misuse, collision, overloading, modification, misapplication, improper installation, or improper service has damaged the Product.

BAJARACK SHALL NOT BE LIABLE FOR ANY DIRECT, INDIRECT, CONSEQUENTIAL, INCIDENTAL, SPECIAL, EXEMPLARY, OR PUNITIVE DAMAGES OR FOR ANY OTHER DAMAGES OF ANY KIND OR NATURE [NO PERIOD.] (INCLUDING, BUT NOT LIMITED TO, LOST PROFITS, DOWN TIME OR LOSS OF USE) UNDER ANY LEGAL THEORY, EVEN IF BAJARACK WAS ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. BAJARACK'S SOLE LIABILITY IS LIMITED TO THE REMEDY SET FORTH ABOVE.

BajaRack reserves the right to change Product design without notice.

RACK COMPONENTS

This illustration is for reference only

A) Rack	(1x)
B) AD & AP bracket top	(2x)
C) AD bracket bottom	(1x)
D) AP bracket bottom	(1x)
E) BD bracket	(1x)
F) BP bracket	(1x)
G) CD bracket	(1x)
H) CP bracket	(1x)
I) Support plate	(4x)

J) 5/16"-18 x 3/4" Hex Cap Screw Stainless Steel	(14x)
K) 5/16"-18 Nylon Insert Lock Nut Stainless Steel	(14x)
L) 5/16" X0.75" OD Flat Washer Stainless Steel	(36x)
M) M8-1.25 x 50mm Hex Cap Screw Stainless Steel	(8x)
N) Grease, for use with all bolts with lock nuts	(1x)

What's in the box

Recommended Tools

- 1/2" wrench for installation
- 1/2" socket for ratchet tool
- 13mm wrench for roof bolts
- 13mm socket for ratchet tool
- 13mm or 1/2" socket for torque meter
- RTV Silicone sealant

Tips and recommendations (please read)

- Please Install the Rack with the help of a friend.
- The load limit of your rack is 300lb please do not exceed.
- Your Rack is an accessory; it is not protection for rollovers

INSTALLATION STEPS

1 Remove plastic covers (factory cover) located on top of roof with a small flat screw driver. First push cover to the right and then use the screw driver to push out. Otherwise, remove factory rack.

Note: Loosen all bolts prior to removal and do not apply downward force! It is recommended to apply RTV silicone sealant in gap around tubes to prevent leaking.

2 Identify the 4 support plates (I) and all 6 roof brackets (B to H). Place the support plates onto the mounting points of the car. The roof brackets will be placed onto the support plates. **See figure for location and orientation of brackets.** Once you have them in place, peel off the labels. The figure-8 retainers will need to be removed

Note: All support plates are the same. The brackets AD & AP (parts B to D) will be installed after placing the rack on the other brackets (E to H).

3 To install brackets E to H you will need 8 washers (L), 8 bolts (M) and a ratchet tool with a 13mm socket ("metric" - remember, it's a Japanese car). Do not tighten completely to allow some adjustment when mounting your rack. (Each bracket needs 2 bolts and 2 washers)

Note: Also apply RTV silicone sealant to bolt threads (roof bolts) to prevent leaking.

INSTALLATION STEPS

4 With the help of a friend, place the rack (A) on top of the brackets and loosely align it according to the brackets.

5 Slide the bolts (J) thru washers (L) and rack slotted plates, and, below rack, add washers (L) and nylon locknuts (K). After all bolts are installed, tighten completely using a 13mm or 1/2" wrench or socket. *In this step you'll need 8 bolts, 16 flat washers and 8 locknuts.*

Note: To prevent seizing, add grease (N) to bolt threads before adding second washer and lock nut. Use grease ONLY on bolts with lock nuts (also the front adjustable brackets).

6 Before to placing the AD and AP brackets you'll need pre assembly them.

For assembly the AD bracket, take the AD bracket bottom (C) and AD & AP bracket top (B), now place the "B" piece on the "C" piece, see the above image as reference. Then, insert washer (L) with bolt (J) through the slots of both pieces and inserting the washer (L) and locknut (K). Only tighten with the hand.

7 Repeat step 6 for assembly the AP bracket, but use for the bottom piece the AP bracket bottom (D), see the above image to identify the orientation of the brackets.

Note: You'll need add grease (N) on the threads of the bolts before to insert with the locknut. The AD & AP brackets bottom has a mark to identify them.

INSTALLATION STEPS

8 Remove the plastic on the bottom of the adjustable brackets and place on the plastic roof channel trim. Slide the bolt (J) and washer (L) through the rack slotted plates and insert washer (L) and nylon lock nut (K).

Note: The adjustable brackets are pre assembled in step 6 and 7.

9 Adjust the height of the adjustable bracket and tighten the preassembled hardware, then tighten the bolt on top. Repeat steps for the 2nd adjustable bracket .

Note: Tighten all bolts using a 13mm or 1/2" wrench or socket. Remember to add grease (N) on bolt threads before inserting into lock nuts.

10 Finally, tighten all roof bolts to the recommended torque 55 in-lb. You can try 13mm or 1/2" wrench or socket.

ROOF RACK!

TECHNICAL SPECIFICATIONS

4RUNNER GEN5

BR-TY4RG5-UT-SPY-0

Utility (flat) Rack with SPY Light System

Includes rack, all mounts, stainless steel hardware, aluminum wind deflector, Spy Light actuator system, and Spy Light cable & switch. Compatible with Bajadesigns 40" S8, Rigid Industries 40" E-Series, and, **with a bar support** (please call to order this item separately), Vision X 35" XMITTER Low Profile LED bars. **LED Lightbar and LED cable/switch are not included.** Please note that our SPY Utility racks are specially designed Utility racks specifically made to be compatible with our SPY Light System.

Material and Thickness: 1" (25.4mm), and 1/2" (12.7mm) Steel tubing

Top Wind Deflector: .062" (1.57mm) 5050-H32 Aluminum

Bottom Wind deflector: .062" (1.57mm) 5050-H32 Aluminum

Finish: Epoxy primer (rust inhibitor) with black powder coating

Rack weight: 80 Lb (36.28Kg)

Weight Capacity: 600 Lb (272 Kg) Static / 300 Lb (136 Kg) Dynamic

Measurements: 47" (1193.8mm) Wide x 92.5" (2349.5 mm) Long x 4.5" (114.3 mm) tall

Total Height (From top of roof to top of rack): 5"

Cargo area: 24.68 ft² (2.29m²)

Mounting method: Roof mounts (2 front adjustable brackets and 4 support brackets)

COMPATIBLE ACCESSORIES
