

CONVEX SAFETY MIRROR

indicates the presence or absence of a moving or stationary vehicle and or pedestrian.

Part #
AB-CM-850

Dimension	850MM (DIA), 2.9 Acrylic mirror face.
Base Dimension	
Material	PP Injected mirror back (Anti UV and Anti Aging) aluminium circle, zinc plated install brackets and acrylic mirror face.
Installation	Can be both wall and pole mounted. Suitable for outdoor use, CONVEX safety mirrors are very durable, vandal resistant, maintenance free and weatherproof .
Weight	9.65 Kg.
Additional Notes	Comes with assembly kit.
Application	Safety mirrors CONVEX are used in shops, factories, warehouses and hospitals for internal security and safety. If placed in low speed vehicle and pedestrian conflict areas such as warehouse driveways, truck loading bays, parking areas and private drive ways, CONVEX safety mirrors improve visibility of vehicles and/or pedestrians including safer access to public roads. Typical uses where lateral visibility and sight distance is poor are T Junctions , concealed drive ways , acute bends of a narrow road such as hairpin bends , parking areas with acute exit driveways and approaches to skewered railway level crossings .
