

Parking Barrier

AB-DBA-900K

Specifications

Dimensions 830mm Length
400mm Width
1188mm Height

Weight 67kg

Material Aluminium Components (Arm)
Rubber Components (Arm)
Steel Construction (Cabinet)

Installation Surface mounted

Additional Notes Boom Gate and arm has optional Accessories that can be applied such as LEDs and a mobile phone remote access control

Description

Parking Barriers by Australian Bollards are boom gate systems ideal for application at the entrance and exit of car parks and secure areas.

They are best used in conjunction with other roadside contraptions including security camera bollards, intercom systems and card readers to create an outstanding parking solution.
