

# Showroom/Airport Type

## Floor Mounted Bump Rails

### AB-FMBR-SA

### Description

Our Protection Range features alternative styles of crash rails bumper guards that can be manufacture to suit all types of column casings, from custom made and made to order to standard circles and squares, to provide the correct solution of wall protection, to suit your specific needs.

This Showroom/Airport style Bump Rail is typically supplied mounted on flat bar posts with a circular baseplate and countersunk fixings.

Our Bumprails can be surface mounted (with the base plates either visible or concealed) or sub-surface mounted.
