

Raptor Pole Protector

AB-RRP-Y

Our Crash Cushion

Our Raptor Pole Protector is a low-cost solution to reducing the severe injuries and fatalities that can result from single car collisions with fixed objects. The buffer is made of two sections and completely surrounds the poles which it protects, providing 360 degree protection; if one side is impacted, the other is still usable. Made of recyclable polyethylene, and easily installable and removable, this pole protector is the perfect combination of convenience and efficiency in purpose, and is ideal for protecting people during collisions with fixed objects along busy roadsides.

Specifications

Post Dimensions	Length: 246cm Width: 115cm	Height: 105cm Weight: 110kg
