

# ANPR SECURITY SYSTEMS

## The perfect system to provide safety for parking spaces.

Automatic Number Plate Recognition (ANPR) systems are low maintenance, tamper resistant solution engineered for the vehicle access monitoring and the recording of essential information. They are primarily installed in parking lots but can also be employed to capture speeding drivers on highways and toll roads.

Available in either a stainless steel or powder coated finish, these innovative products can be utilized alongside other roadside furniture such as boom barrier gates and intercom systems to deliver an exceptional security experience.

Capable of surface or sub surface mounting, these units can house CCTV Video, Automatic Number Plate Recognition or Plate Capture DVR devices and can be adjusted to suit the corresponding height of the vehicle.

The camera bollard can be custom manufactured to meet customer requirements. These bollards are rust protected with all camera facilities provided.

The Australian Bollards Camera Bollard is a low maintenance, tamper resistant solution in either stainless steel or powder coated finish, is available in a variety of colors, for safely housing a low mounted security CCTV Video, (ANPR) Automatic Number Plate Recognition or Plate Capture DVR system devices cameras.

Automatic Number Plate Recognition (ANPR), also known as an LPR Camera, is a specialised type of video surveillance camera that is designed to capture numbers and letters of licence plates on vehicles.

This allows vehicle registration plates to be read, which creates vehicle location data. They employ both built-in software and hardware that compensates for speed, weather, and headlight glare.

# Australian Bollards

Great Products, Great Prices  
Proudly by NJM Group.

Welcome to Australian Bollards, aesthetically pleasing architecturally designed, functional, high quality, strong and durable, "One Stop Shop" comprehensive range of products.

Providing you the perfect economic and cost effective, must have budget solution, for your specific needs. Our Bollards are designed to protect Infrastructure, traffic management, car parking system & asset protection.

Our Australian made and developed bollards, have come a long way from the simple rigid post construction of yester year and are ideal for a wide range of environments, application, uses and duty type options, in all Australia wide conditions.

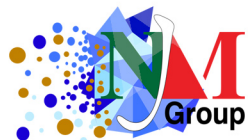

We now offer a range of Electronic Display Solutions and manufacture components for SKIDATA systems. Our products are manufactured locally in our Heidelberg West factory, and if we don't have a bollard that suits your needs, we can create a custom design to fit your requirements.

We design, manufacture, stock, install, deliver and maintain our bollards, to exacting specifications to provide excellent protection, for personnel, business commercial and or Federal, State or local council assets and security.

Since its inception in 1992, in excess of 22 years the Australian Bollards team, has been successfully been providing a wealth of knowledge and expertise, guiding many thousands of customers on the correct bollard selections, appropriate to their specific projects applications.

We also provide engineering services for steel fabrications, general steel repairs and deliver building and office maintenance and renovations.
