

BEACH SOLO

Australian Bollards Beach Shower Range features numerous solutions that are practical, efficient and Australian-made.

Australian Bollards beautifully designed beach slim shower features a combination of strength that suits every location, whether fresh water or saltwater is in use. Manufactured and designed with a modern stainless-steel look and architectural appearance, the beach slim shower includes an added commercial aspect and timed flow tapware. What makes this product even better is how it blends structural strength with simple style and visual appeal for resorts and beach areas. (Can be customised based on specific requirements).

Design specifications:

- Certified structural 316 Marine grade stainless steel.
- Standard bottom inlet plumbing with SS Vandal resistant Dynabolts supplied.
- Timed flow tapware 15-30 second operation.
- Completed pre-plumbed and tested to maximum of 500 kpa.
- Overall height: 2000mm base, 250mm square.
- 100 x 50mm Welded Tubing with access panels.

Australian Bollards Beach Wall Shower features a durable finish in 316 marine grade stainless steel, which guarantees this product won't rust. This wall-mounted solution is great for areas with limited space that only allows a maximum footprint of 100mm. This incredible solution features an easy one-touch operation for all users and cost savings benefits of water efficiency.

Australian Bollards Beach Solo Shower has a proven track record and astonishing performance in its environment and has survived the harshest of Australian conditions and weather events. Built strong, as proven through floods, cyclones and standing the test of time, this product features structural marine grade stainless steel, which is the most 'fit for purpose' material within a seaside environment. This product is perfect for open beaches where gale-force winds and destructive salt-air and water occur, making the 3mm stainless steel welded tube practical. The beach solo features a welded cap and base plate, which are standard features of strength and vandal resistance. This everyday solution features an easy one-touch operation for all users and cost savings benefits of water efficiency.

Australian Bollards Beach Shower Accessories features a functional Board Bar. You can either add one only, one to each side, or maximise your investment with a bar that is placed between two showers, a Foot Rinse stand or a Doggy Hydration station. This accessory proves to be particularly convenient for the surfboard and keeps both towels and clothes dry and sand free.

Australian Bollards Doggy Dish caters for a man's best friend, featuring a flip over bowl for simple emptying, keeping water clean and fresh between drinks. This strong and durable solution is made from 316 marine grade stainless steel meaning rusting will not occur. The dog dish can be added to any beach range shower and is load rated at 100kg.

Design specifications:

- Certified structural 316 Marine grade stainless steel.
- Board Bars: 80 x 40 Tubing 1m from shower x 1m high.
- Dog Bowl: 160 x 160mm.

Australian Bollards Beach Foot Rinse Stands and Dog Hydration Station is a signature shower rose, which has a Lifetime Guarantee. These tough and secure mini shower-stands are highly functional and water-saving with have maximum potential. This solution can either be used as a stand-alone product or as an accessory in a multi-hub setup. The water efficient roses provide a comfortable and usable rinsing option for legs and feet and can be installed alongside existing shower poles for added amenity; in children's and dog parks, or non-swim beach areas and campgrounds. It requires its own separate water connection at installation as this solution is fully plumbed as a separate product. By adding a doggy dish to this solution, you give the foot rinse stand a greater dynamic. By then including it into a Board Bar stand as an add-on to any of the Beach shower range, you are investing in a useful multifunction hub most-needed at popular and busy beaches.

Design specifications:

- Certified structural 316 Marine grade stainless steel.
- Standard bottom inlet plumbing with SS Vandal resistant Dynabolts supplied.
- Timed flow tapware 10 second operation.
- Completely pre-plumbed and tested to maximum 500 kpa.
