Semi Automatic Bollard

The Semiautomatic Retractable Bollard has been designed to control access to a site with a high level security, guaranteeing pedestrian access whilst blocking the area to road traffic.

Its main features are:

- A. Manufactured from stainless steel or steel
- B. Available in the same styles as Electromechanical and Pneumatic bollards to save on cost.
- C. Bollard is raised by a gas spring.
- D. High impact strength and easy installation. No power supply needed.
- E. Height above ground: 600mm/750mm/900mm
- F. Different color reflective tape (optional)
