

The idea with this design is to create clusters of flowers and stitches around the LOVE letters. I usually start with one color and move around the design, then stitch the next color moving around the design, filling in spaces and flowers. After you have stitched all the colors, you will probably need to go back and fill in empty spaces with straight stitches, more small flowers or french knots

Transfer the design using your favorite transfer method. I prefer printing the design on water soluble stabilizer. I've been using a new to me method of temporarily gluing my fabric to a sheet of copy paper and printing directly on the fabric.

Couching is a great stitch for the letters! or Backstitch

Suggested colors for a classic .You can use any color you want! and make it your own love story.
