*Shelf life is influenced by many conditions of which temperature, exposure to light/air and general good storage are the major factors. Materials stored in adverse conditions will deteriorate much faster. Re-Test dates signifies minimum timeframe that product should remain in good useable conditions if stored as recommended. Expiry date is subjective. Typical indicators of re-test failure would be changes in organic properties such as clarity, colour, sediment, haze, off odour. Such changes may be gradual and slight.
