

# **SMART LEVEL**

— one TOUGH level —

Smart Level warrants the precision construction altimeter against defects in material or workmanship at no charge for a period of 90 days from the date of purchase. Beyond 90 days, components are pro-rated for a period of One Year from the date of purchase. If a problem arises, the user is first instructed to contact Smart Level for technical assistance. If it is then determined by Smart Level that there is a possible problem with the level, the user will be instructed to return the level to Smart Level for further review. Upon inspection Smart Level will, at our option, repair or replace any defective components as is warranted at our discretion. If the level is determined to be in proper working order, or damaged by the user, Smart Level will notify the user of any charges, before repairs are made or the level is returned.

Filling the level with any fluid other than that specified by Smart Level will void the warranty.

There is a \$49 minimum service charge on levels not covered under warranty.
