

Coway AIRMEGA ProX

Your Solution to Business Air Purification

Coway's newest air purifier, designed specifically for businesses, is our largest-coverage and most powerful model yet. With the Airmega ProX, all businesses can rely on cleaner, healthier air for their employees and customers. Read on to find out what makes the ProX a game-changer in commercial air purification.

Size Matters

All-Encompassing Coverage

The Airmega ProX exceeds prior Coway air purifiers' coverage by almost three times! Just one ProX can purify the air in a 4,253 ft² room up to one time per hour. This makes it perfect for large open office spaces, sales floors with open concepts and other large interiors. For reference, the average individual needs roughly 125 ft² of working space, meaning that one ProX could help purify the air for about 34 employees in a coworking space! (Purifies 1,063 ft² in 15 mins, 2,126 ft² in 30 mins, 4,253 ft² in 60mins)²

Efficient Design

To maximize efficiency and better turn over the air in a room, the Airmega ProX utilizes a dual motor design to suck in unfiltered air from both sides. This speeds up the air purification process and allows for the massive air capacity that this unit can purify.

Biggest Advanced Filters = Cleaner Air

To maximize the new size and efficiency of the ProX, it is necessary for the unit to have more internal filters to process all that increased air intake. That's why this Airmega has 2 Max2 Filters, the largest filter sizes among all Airmegas. These industry leading cartridge style filters feature a 2-in-1 design. Max2 filters have an Activated Carbon Filter that captures odors and harmful VOCs that provide powerful deodorization as well as a certified Coway Green True HEPA™ filter, which helps remove the small unwanted particles and contaminants.

Simplifying Your Business Air Purification

Powerful 3-Stage Filtration System

The pre-filter and the Max2 filter set combine to help you breathe easier. This Coway air purifier efficiently filters various harmful sources and removes 99.999%¹ of ultra-fine particles down to 0.01 microns, which is smaller than most viruses and bacteria. [Watch video to learn more](#)

Cutting-edge Functionality

- Smart modes (Auto / Eco / Silent / Turbo)
- Real-time AQI
- Particle Sensor (PM 10 / 2.5 / 1)
- Quiet Operation (23~46 dB(A))

Always Easy to Use

- Built in convenience wheel
- Touch button Lock
- Filter Replacement Indicator
- Washable Permanent Pre-filter
- Efficiency/Energy Star Certification

Beauty in Simplicity

Airmega ProX is sleek, understated and elegant. It can be a challenge fitting a new piece of equipment in an already busy office or interior space. It is amazing how much power the Airmega ProX fits into its slim, refined design, and it can stand out or blend into any indoor area.

ABOUT COWAY

Our obsession with home health began in Korea in 1989. Today, Coway is proud to bring our award-winning products and home health expertise to the US with Coway Airmega air purifiers, Coway Bidetmega for bathrooms and Coway Aquamega water purifiers.

Since our founding, Coway has become a global leader in intensive research, engineering and innovation, amassing over 6,000 intellectual property rights in all.

The Coway R&D Center, an environmental technology research institute, has 427 researchers, developing technologies around all aspects of life. The center also serves as our environmental quality, design and cosmetics institute.

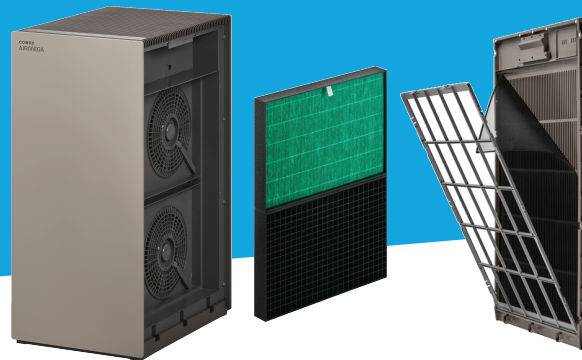

Whether researching billions of data points to document air quality, conducting hundreds of tests to create the perfect seat for every body shape, or employing twenty-three certified water sommeliers—when we say we're obsessed with health, we mean it.

¹Coway air purifiers have been proven to trap dust, pollen, dander, viruses and bacteria in the air based on KCL(Korea Conformity Laboratories) testing. They have been tested in a 30m³ size chamber according to the Korea Air Cleaning Association standard (SPS-KACA 002-132:2018 Modified) to measure the 0.01µm size of particle removal rate. It was tested on maximum fan speed in normal room temperature and humidity conditions. The performance may vary in the actual living environment of customers. Tested with Coway Airmega 150, AP-1216L, AP-1512HH, AP-1512HHS, 200M, Icon, IconS, 250, 250S, 300, 300S, 400, 400S.

² The coverage area of the air purifier is based on an area where the air cleaner can make two air changes per hour (ACPH). An air change per hour translates to how many times an air purifier can clean an area, assuming the height of a ceiling to be 8 ft, in one hour. Therefore *** means one air changes per hour means that the cleaner can clean the area once every 15 minutes. And ** means two air changes per hour means that the cleaner can clean the area once every 30 minutes. And * means air changes per hour means that the air purifier can clean the area once every 60 minutes. The energy efficiency of this ENERGY STAR certified model is measured based on a ratio between the model's CADR for Smoke and the electrical energy it consumes, or CADR/Watt.
