## 100% HUMAN HAIR EXTENSIONS

The 100% Human Hair Extensions can be styled with any styling tools, just like your own hair. Easy to put in and take out, the extensions quickly add color, volume and length to any style.

The extensions are lightweight, but the clips stay put no matter how active your day. The set comes with seven different sized pieces ranging from the widest 3 clip piece to the slim 1 clip pieces.

Clips match the hair color and seamlessly blend in. Use all seven to make a red carpet entrance, or use just a few for a more subtle look.

---

## ENHANCE YOUR LOOK

The 100% Human Hair Extensions are offered in a variety of different colors to match any hair type. Not quite your hair color? The extensions can also be color treated.

---

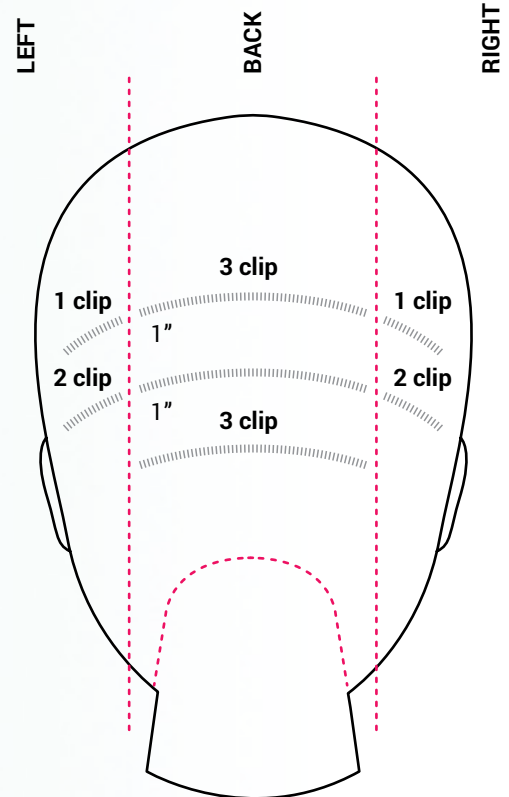

## HOW TO USE

The PYT 100% Human Hair Extensions work great with the PYT line of styling tools. Once you have placed the extensions in your hair you can style your hair with one of the PYT styling tools. The human hair extensions can be styled just like your own hair.

Use a comb to divide the top from the bottom of your hair. Go from temple to temple. This will separate the crown of your hair from the lower section of hair. Twist up the top section of your hair, and use a clip to hold the top section in place.

Open clips, insert just below the part and snap shut. Place the extensions throughout your head as shown in the diagram. The extensions should be placed in three levels at 1 inch intervals, as shown. The middle level should be about in line with the top of the ear. Repeat the parting of the hair for each of the three levels.

To take off extensions part hair to reveal the clips. Unclip, and gently pull the extension piece out. Do not try to pull the extensions out without first unclipping

---

## HOW TO CARE FOR YOUR EXTENSIONS

Always remove the extensions before either brushing or washing your hair. After you have removed the extensions from your hair, gently brush the hair pieces with either a comb or a bristle brush to remove any tangles. Hold by the clip end and brush from clip to end, just like you would your own hair.

If you would like to clean the extensions, use a mild shampoo, diluted fabric soap or regular liquid soap. The milder the soap the better. Dilute a little soap in cool or cold water. Dip the extensions into the soapy water until the hair is saturated. Do not rub the hair so that it does not become tangled. Rinse the hair of the soap and blot dry with a towel.

Once the hair has dried, gently brush it. Do not brush the extensions while wet. The extensions do not need any additional styling since they will dry back into their original condition. Do not attempt to brush or wash the extensions while still attached to your hair.
