

The Original Security Door Bar

For over 25 Years our Security Door Bars have been manufactured to the most common door sizes (36", 42", 48", etc.). Yet there is a demand for odd size doors, which we custom cut for our customers. We are happy to customize your bar to a special length at no extra charge, and we pride ourselves in shipping the same day. Please, let us be of service.

Note: Customers should always comply with local building codes.

Single Outswing Door Bar

Model Numbers: **SB-01-0036, SB-01-0040,
SB-01-0042, SB-01-0048**

For use on metal or wood doors. Heavy duty steel security bars for single doors.

Double Outswing Door Bar

Model Numbers: **SB-01-0072, SB-01-0060,
SB-01-0096**

For use on metal or wood doors. Heavy duty steel security bars for double doors.

Extra Long "L" Bolts

Model Number: **SB-P1-1015**

Extra Long "L" Bolts for Outswing Exit Security Bars. Supplied in a pair. Used for deep door frames. Approx. 13 inches.

Caution Sign

Model Number: **SB-P1-CD02**

Caution signs are so important in this day and time because of fire code enforcements.

Storing Brackets

Model Number: **SB-P1-SB01**

This keeps your customers and employees from accidentally placing the security bar back on the door in a locked position.

Steel Grip

Model Number: **SB-P1-GRIP**

These three little grams of liquid glue welds together steel to steel, rubber to steel and various other jobs involving our security hardware.

Ring Bolts

Model Numbers: **SB-10-7011 (White)** and **SB-10-7021 (Gold)**

The “**RING BOLT**” was designed for residential use, especially apartments. The Texas Building code says it has the same function as the keyless dead bolt.

Barrel Nut Kit

Model Number: **SB-BR-NUTS**

Barrel Nuts are used with hollow metal door frames. It's a method of getting a nut on the inside of a hollow metal frame.
