MagWrite: USER GUIDE

Product	**MagWrite - magnetic wallpaper, high receptivity**
Description	**MagWrite has a high receptivity rating so works with both MagPlus and MagLite magnet types.**
	MagWrite Matt has a non-reflective matt dry-erase surface with features that include:
	- hard wearing semi-matt PET smudge-free surface for dry-erase or chalk pens
	- Clean using generic whiteboard spray and microfibre cloth.
	- semi-matt ideal for projector use
	- easy to hang in multiple configurations
	- available at 120cm width by 3m, 6m, 9m, 12m lengths
	MagWrite Gloss has a highly reflective gloss dry-erase surface with features that include:
	- hard wearing high gloss PET surface for smoother writing dry-erase or chalk pens
	- Easy clean using generic whiteboard spray and microfibre cloth.
	- easy to hang in multiple configurations
	- available at 120cm width by 3m, 6m, 9m, 12m lengths
Receptivity Rating	4/5
Weight	1800 grammes per square metre
Fire Rating	EuroClass D-s1, d0
Roll Dimensions	MagWrite Matt: 120cm width x 3m, 6m, 9m, 12m lengths
	MagWrite Gloss: 120cm width x 3m, 6m, 12m lengths
Adhesives	MagVOV Adhesive
Warranty	7 Years
Maintenance:	- MagWrite works with all high-quality dry-erase and chalk pens
	- Clean with Whiteboard Spray and Microfibre Cloth
	- Regularly clean surface to keep in optimum condition
	- Important: Avoid felt pad cleaners and cheap pens as they attract grit and scratch the surface
Magnet Usage:	- MagWrite has high receptivity so works with all magnet types
	- MagPlus are high-power neodymium magnets for holding items
	- MagLite are low-power sheet magnets for placement use
Health and Safety:	Warning - high-power magnets can be dangerous if ingested and should not be used by children, always read safety information provided.
Classification:	This product is classified as non-hazardous and therefore does not require any special handling. This product does not require special labelling.
Fire Fighting:	Any extinguishing media are suitable. Wear self contained breathing apparatus, protective clothing and full face mask. Fumes should be ventilated immediately due to possible liberation of noxious gases.
Ecological:	This product is not bio-degradable. Dispose of in accordance with Local Authority regulations or via an authorised contractor.

IMPORTANT: MagScapes wallcoverings can act as a conductor of electricity due to the ferrous content in the vinyl - do not allow it to come into contact with exposed wires, and take care when installing around electrical wiring and boxes. Turn electricity off.

MagWrite: DECORATOR GUIDE

Configuration

It is recommended that MagWrite Wallcoverings are hung horizontally and positioned at optimum writing height for comfortable writing experience. Other configurations are possible as shown above.

Tools:

- A felt or sponge roller for paste application
- Scissors or sharp blade knife
- Straight edge
- Soft wallpaper brush
- Microfibre cloth or sponge
- Clean water and mild detergent

Wall preparation:

- MagWrite writing materials work best when applied to mirror smooth plaster surface
- ensure the wall surface is clean, dry, sound, mirror smooth and free from paint or chemicals
- best results will be obtained if the base plaster is sized with adhesive or sealed with a PVA
- where necessary fill holes with filler and use fine sandpaper to smooth

Adhesives/Primers:

- for plaster boards/walls:
- prepare base wall with a PVA (Unibond Super PVA) to create a seal.
- apply MagVOV Adhesive directly to the wall and apply pre-cut strips of MagWrite.

- for mdf/plywood/panels:
- prepare base panel with an oil based primer to create a seal (Zinsser 'All Coat' Solvent Base Primer).
- apply MagVOV Adhesive directly to the panel and apply pre-cut strips of MagWrite.

Note: We strongly advise that you test in advance before any major installation.

IMPORTANT: MagScapes wallcoverings can act as a conductor of electricity due to the ferrous content in the vinyl - do not allow it to come into contact with exposed wires, and take care when installing around electrical wiring and boxes. Turn electricity off.

Hanging guide:

- for best writing experience it is recommended that MagWrite is applied horizontally
- allow wallcoverings to adjust to room temperature
- cut wallcovering into required lengths
- ensure wallcoverings are hung using the recommended adhesive/primer option (see above)
- pour adhesive into a pasting tray and using a roller apply paste evenly to the wall (soaking is not necessary) cover an area to allow for 1-2 drops
- apply the cut lengths, edge to edge, vertically or horizontally as required
- apply MagWrite to the wall (black side to face the wall)
- use a microfibre cloth covered straight edge to flush out air bubbles across all areas of the surface using sweeping action from the centre outward
- use masking tape to top edge to secure if likely to slip during install
- use a straight edge and new blade knife to trim corners and edges
- do not puncture air bubbles and do not use metal or sharp objects (other than the cutting knife) on the surface when installing the material
- immediately remove any excess paste with a damp sponge with mild detergent and wipe surface clean
- leave to dry thoroughly (min 24 hrs)

Finishing options:

Seams: - MagWrite is machine cut for butt joined seams. Try to have seams placed where the pen is least likely to cross to reduce visible build-up of ink.

Edging: - to prevent pens from skipping on to non-writeable areas it is recommended that a decorative edging strip is used

Removal: - gently strip away from wall using a scraper

IMPORTANT: MagScapes wallcoverings can act as a conductor of electricity due to the ferrous content in the vinyl - do not allow it to come into contact with exposed wires, and take care when installing around electrical wiring and boxes. Turn electricity off.
