HPC FIRE ONE APP

ONE APP, THREE GREAT PRODUCTS!

HPC Fire Inspired's new augmented reality app lets you select options, scan your area, and place our products in your design. Just select, scan & see the design in real time.

Download it today on your Apple, Droid, or Google phone today by searching "HPC One App". Or go to hpcfire.com/one-app today.

① HPC AR

The Augmented Reality app allows you to see our finished products in real-time to make sure the aesthetic and look are exactly what you desire. HPC's AR App is a big hit with contractors and designers alike and truely enhances the customer experience.

② HITS

The HITS app is a building instruction, tools needed, clearance given, troubleshooting beast for anyone that has an HPC Fire feature. Simply choose the product you are working with and let the app do the rest. It starts with tools and clearances needed and goes into the step-by-step instructions of how to properly install any HPC Fire appliance.

③ HPC FIRE

The HPC FIRE app allows you to control the electronic ignition-High-Low models. The HPC FIRE app does a lot more than just light your fire, it allows you to change the flame height from high to low and achieve the ambiance you desire. As added safety precautions the app offers password protected parental safety controls.
