

Basso by Manuel Amaral Netto

Bar Basso is not only part of a ritual for those who attend the Milan Design Fair but for every Italian who enjoys a proper Negroni. You can't miss it and neither can you miss this portable mini bar designed by Manuel Amaral Netto. Its strong aesthetics gives character and charm to any room you may place it. Yes, it is a mini bar by nature, but, depending on your mood or any given context, it can just as well be something else. It swings on four casters wheels making it very easy to move around and the top tray has a comfortable waterproof cork mat so that you can place anything on it. Bottom bucket works as an open container to store anything from bottles to magazines. The mini bar Basso is above all a piece of furniture to enjoy your home the best way you see it.
