

Tools You Will Need

- Paint Brushes
- Water
- Non-porous surface to mix your paint on
- Artesprix Color Mixing Chart

Directions

1. Start by shaking the sublimation acrylic paint tubes to ensure a homogenous mixture.
2. Use provided colors straight from the tubes or mix colors as desired to create additional color options.
3. Paint on plain paper. Keep in mind any text will need to be mirrored.
4. Allow paint to dry on paper before transfer.
5. Transfer according to the specifications associated with your sublimation blank, different sublimation materials require different transfer time, temperatures, and pressure settings. Refer to Artesprix blank instructions for transfer specifications.
6. Clean brushes with soap and water.

Pro Tips:

- A little sublimation paint goes a long way.
- A Heat Gun or Hair Dryer may be used to speed up the drying process.
- Artesprix Sublimation Acrylic paint is designed to be mixed.
- White Acrylic Lighting Medium for Sublimation will not transfer. Use this in conjunction with the other nine colors to create any color.
