

Tools You Will Need

- Artesprix Iron-on-Ink Sublimation Stamp Pad
- Artesprix Iron-on-Ink Sublimation Stamp Ink Refill
- Plastic Ruler (or Plastic Spoon)
- Paper Towel

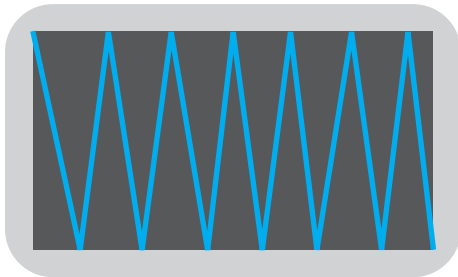

Directions

When the imprint on the paper from your Sublimation Stamp Pad begins to get lighter, it is time to re-ink your Sublimation Stamp Pad.

1. Remove the lid from your Sublimation Stamp Pad.
2. Starting in one corner of the foam, gently squeeze the ink from the droplet bottle and slowly zig-zag back and forth from edge to edge until you reach the opposite corner.

Note: Do not over ink or tear the Sublimation Stamp Pad.

3. Using a Plastic Ruler (or plastic spoon), gently scrape the top of the Sublimation Stamp Pad in the same direction as in step #3. Wipe off Plastic Ruler (or plastic spoon) with paper towel.
4. Repeat Step #3 and Step #4, but in the opposite direction.
5. Allow the Sublimation Stamp Pad to rest 25-30 minutes before use.

Caring for your stamps:

- Clean your stamps immediately after use with Artesprix Multi-Purpose Cleaner. Discoloration from inks is normal and does not affect stamp performance.
