SILVERLINE Premium Interproximal Brushes are made with durable Dupont nylon bristles and stainless steel stem wire. The brushes are tapered and graduated in sizes (C, S, A, B, D and E) from 1/8 inch to 5/8 inch in diameter. The two largest brushes (D and E) are for spaces where a tooth or several teeth have been lost, leaving the adjacent proximal surfaces very difficult to clean with a traditional brush. Use the largest size that fits between the teeth without forcing it. **DO NOT FORCE BETWEEN THE TEETH.** A brush too large for the interproximal space will cause the wire to rub on the teeth and may result in damage to enamel or dental work.

GOLDLINE Premium Interproximal Brushes are made with durable Dupont nylon bristles and have a yellow plastic coated stem wire. They are designed to prevent scratching and may be used by patients with dental implants or with sensitive teeth. The brushes are tapered and graduated in sizes (C, S, A, B) from 1/8 inch to 5/16 inch in diameter. Use the largest size that fits between the teeth without forcing it. A brush too large for the interproximal space which rubs on the teeth may cause the protective plastic coating on the wire to wear off and result in damage to enamel or dental work.

MADE IN THE USA

SATISFACTION GUARANTEED • THANK YOU

Brush sizes: D-SL & E-SL are designed to clean where teeth are missing.
