

TX-AI389 Remote Control (DAEWOO) **(303MHz)**

Daewoo Part Number: AI380TX

Important Note: This remote can only be programmed, providing we have the units serial number.

Programming Remote Controls

Up to 8 remote transmitters can be programmed to the AI380 Immobiliser by using the Antitheft programmer.

From factory, the unit will have 2 remotes already programmed to the immobiliser system. If the unit has a serial number of 84321, then the remotes will be programmed like follows:

- 1st Remote : 84321-1.
- 2nd Remote : 84321-2.

Once the remotes are programmed, please place or replace the sticker on the remote PCB so it contains the correct serial number.
Also, place a sticker with the correct serial number
