#### 5.4 Special firefighting procedure

Move container from fire area if you can do so without risk. Water runoff can cause environmental damage.

#### **5.5 Advise for firefighters**

Cool tanks/drums with water spray/remove them into safety. Do not move the load if exposed to heat. Firefighters must use standard protective equipment including flame retardant coat, helmet, gloves, rubber boots, and self-contained breathing apparatus.

#### 5.6 Unusual Fire Hazards:

Not known.

#### 6. ACCIDENTAL RELEASE MEASURES

### 6.1 Personal precautions, protective equipment and emergency procedures

Keep unnecessary personnel away. Local authorities should be advised if significant spillages cannot be contained. Stop engines and no smoking. No naked flames or sparks. Sparks- and explosion-proof appliances and lighting equipment. Keep container closed. Wash contaminated clothes. Wear personal protection equipment (Refer to section 8).

#### **6.2 Environmental precautions**

Prevent further leakage or spillage if safe to do so. Avoid release to the environment.

#### 6.3 Methods and material for containment and cleaning up

**Large spills:** Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Cover with plastic sheet to prevent spreading. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Prevent entry into waterways, sewer, basements or confined areas.

**Small spills:** Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

#### 6.4 Reference to other sections

Safe handling: Refer to section 7 Personal protection equipment: Refer to section 8 Disposal: Refer to section 13
