- Internal Cooldry Mesh Liner with Liquid Resistant Membrane
- Extended Nylon Cuff with gaiter closure to keep out debris
- Reflective markings on fingertips for increased visibility
- High Visibility for increased safety

Stout TPR is designed to disperse impact force energy away from the hand by distributing impact outwards and upwards to absorb the force and reduce as much injury as possible. Stout TPR creates a cushion barrier from the tip of the fingertip, over the knuckle and to the back of the hand, equaling a reduction in peak impact force. Stout Gloves are not classified as impact or cut proof. These gloves offer resistance to potentially dangerous elements. Please use gloves safely and responsibly to mitigate injury.
