# SLNT®

## PATENTED FARADAY BAGS

SLNT.COM

# MISSION

Empower humanity to reclaim their right to disconnect. With effortless gear that fits into everyday routines, we make navigating modern life safer and healthier. We give you autonomy over your digital life.

**SILENCE THE CHAOS™**

# WHY YOU NEED US

Your privacy, security, and health have never been in better hands.

**PRIVACY** - Cyber crime is on the rise, protect yourself and your private data against hacking and cyber attacks.

**SECURITY** - Protect yourself and your assets with our security products. Prevent location tracking and remote car theft.

**HEALTH** - Technology puts your physical and mental health at risk. Block harmful EMF radiation and create healthy disconnection habits with us.

# FROM OUR CUSTOMERS

Find out why they chose SLNT® & how it can work for you.

**PRIVACY**

*"**I use SLNT® to stay anonymous.** The threat to our personal information has never been greater. I want the power to protect my own privacy, and not leave it in the hands of operating systems and software"*
*-Marcus Capone, Veteran*

## USE CASE

• Protect your data from hackers • Stop your phone from being tracked

**SECURITY**

*"I carry my SLNT® Faraday bag with me at all times and my phone is inside it more than out. **I trust SLNT® to block all invasive signals** to the sensitive devices carried by me and my clients. They are absolutely mandatory during meetings with highly targeted individuals"*
*-Michael Bazzell, Author/Privacy Consultant*

## USE CASE

• EMP protection • Thwart remote car theft via relay attacks • Military operations: mobile SCIF, classified courier, signal management

**HEALTH**

*"The data on smart phones, the heat & NON-heat related alterations in sperm quality & numbers are straightforward and basically, it's not a good picture. **Why isn't that more known?**"*
*-Andrew D. Huberman, Ph.D.*

## USE CASE

• Promotes disconnecting from devices • Blocks EMF radiation • Removes classroom distractions • Creates phone-free spaces

## TRUSTED BY

# OUR TECHNOLOGY

Our Faraday cage technology is at the core of everything we do. SLNT® holds many patents and prioritizes performance.
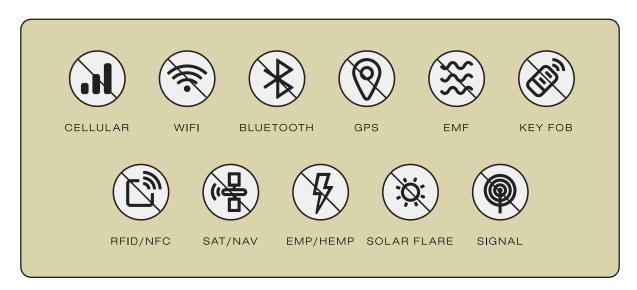

# FARADAY CAGE

At the core of all our products is our patented signal-blocking tech. Our Faraday products use custom materials and patented closures to block all signal and offer a wide array of benefits.

## FARADAY MATERIAL

**MULTISHIELD®**

Multishield® is our Faraday material. Our material is made with a proprietary blend and blocks all signal.

## INSTANTLY BLOCK

| CELLULAR | WIFI | BLUETOOTH | GPS | EMF | KEY FOB |
|---|---|---|---|---|---|

| RFID/NFC | SAT/NAV | EMP/HEMP | SOLAR FLARE | SIGNAL |
|---|---|---|---|---|

## CLOSURE SYSTEMS

**Silent Pocket®**

Silent Pocket® is our Faraday cage closure technology. We hold multiple patents and use a variety of designs.

**PATENTED MAGNETIC** includes a two part closure including internal ribs and an external magnetic closure, creating complete signal blocking.

**ROLL DOWN** closure is utilized in both our dry bag series and our utility products. Multiple rolls ensure complete signal blocking.
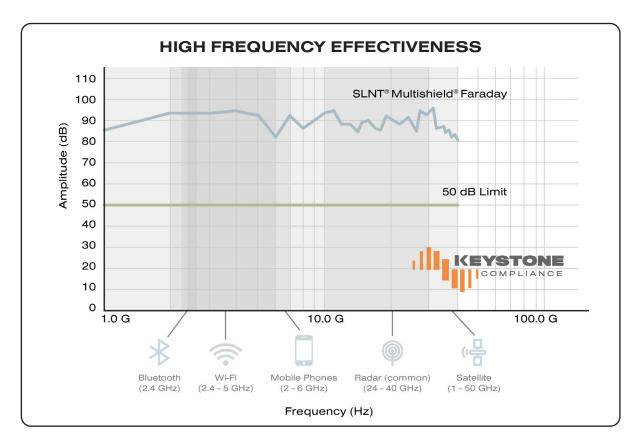

# TESTING

All of our Faraday products and materials are third-party tested and real world tested under the highest scrutiny. We hold multiple patents and patent pending.

## THIRD-PARTY TESTING —————————————— LEARN MORE

We partnered with Keystone Compliance, to ensure that we have the most accurate results. Keystone Compliance is an award-winning independent test lab. Our third-party testing procedures are specially created to test our material to the utmost extent.

### HIGH FREQUENCY EFFECTIVENESS

SLNT® Multishield® Faraday

50 dB Limit

KEYSTONE COMPLIANCE

Amplitude (dB): 110, 100, 90, 80, 70, 60, 50, 40, 30, 20, 10, 0

Frequency (Hz): 1.0 G — 10.0 G — 100.0 G

Bluetooth (2.4 GHz)
Wi-Fi (2.4 – 5 GHz)
Mobile Phones (2 – 6 GHz)
Radar (common) (24 – 40 GHz)
Satellite (1 – 50 GHz)

## COMPLIANCE ———————————————— LEARN MORE

**MIL-STD-188-125-2** is a military standard that sets the criteria for testing the shielding effectiveness of electronic components and systems.

**The IEEE 299-2006** (1 – 40GHz) standard assesses the shielding effectiveness of materials. Institute of Electrical and Electronics Engineers.

# FARADAY SLEEVES

Faraday sleeves offer the simplest and most secure solution to disconnect your devices from the digital realm.

# FARADAY PHONE SLEEVE

MSRP $59.95 - $99.95

Protect your phone and your privacy with our slim Faraday phone sleeve, designed to block all signals and keep your data secure on the go.

# FARADAY FAQ

## WHAT IS A FARADAY BAG?

A Faraday bag is a signal blocking bag that kills wireless signals to and from your device. SLNT® utilizes its patented Silent Pocket® construction and Multishield® Faraday fabric to create sleek Faraday Cages that encapsulate mobile devices like phones, tablets, key fobs and laptops from emitting or receiving any radio frequency.
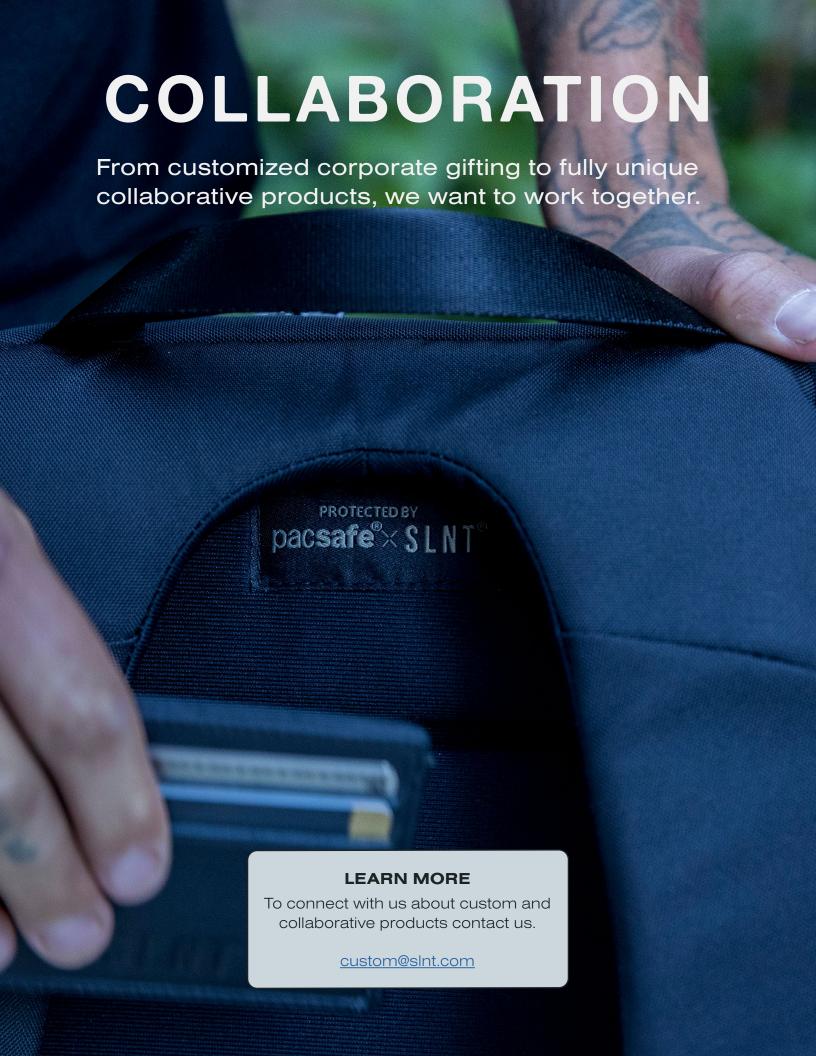

## WHAT IS A FARADAY CAGE?

The Faraday cage was invented by Michael Faraday in 1836. In layman's terms, it is an enclosed structure made of conductive materials, such as copper, silver or other metal that cancels electronic fields from entering or exiting. The Faraday cage is designed to block or prevent the entry or exit of all signal.
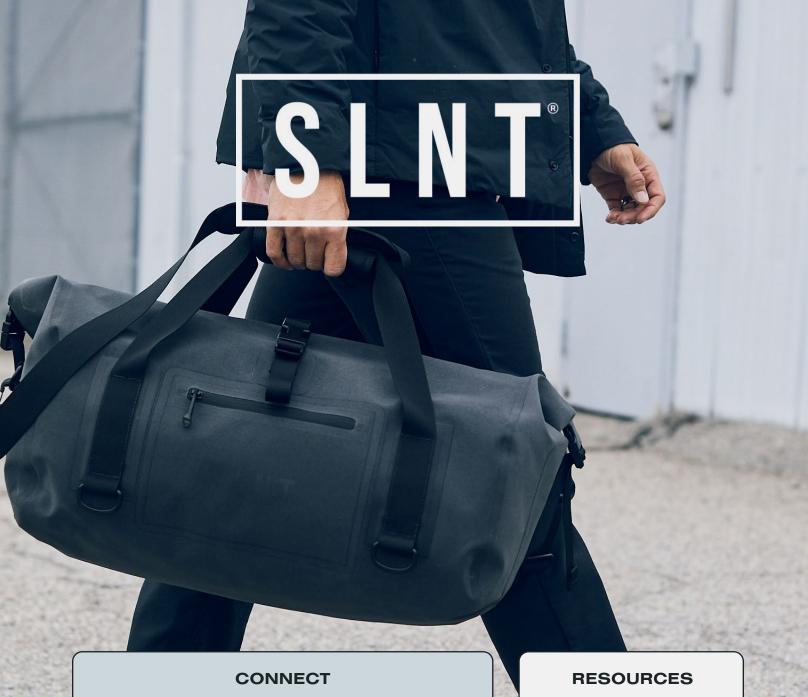

## WHAT SIGNALS DO FARADAY BAGS BLOCK?

Cellular, WiFi, Bluetooth, GPS, RFID, NFC, EMP, Satellite, Navigation, Solar Flare, and EMF Radiation. Silent Pocket® with Multishield® (Faraday Shielding Material) is MIL STD 188 125 2 compliant, and exceeds IEEE 299-2006 (1 - 40GHz) standards. (100,000:1 reduction, see testing page here).

## CAN I JUST TURN OFF MY DEVICE?

Great question! Smartphones are never really "off" because you cannot remove the power source. In many cases, phones may still be active even though they appear to be turned off. We view this more as "dormant" state, it may still be able to harvest your data or report your location.

# COLLABORATION

From customized corporate gifting to fully unique collaborative products, we want to work together.
