

# Assembly Instructions for "2 x Wooden Barracks—Military Camp"

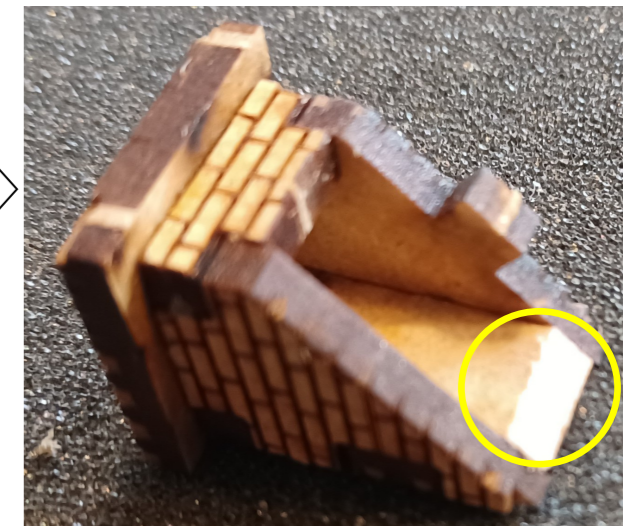

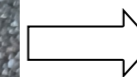

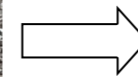

1: Glue together shown pieces for the posts under the bottom of the building. (4x2)

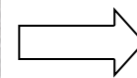

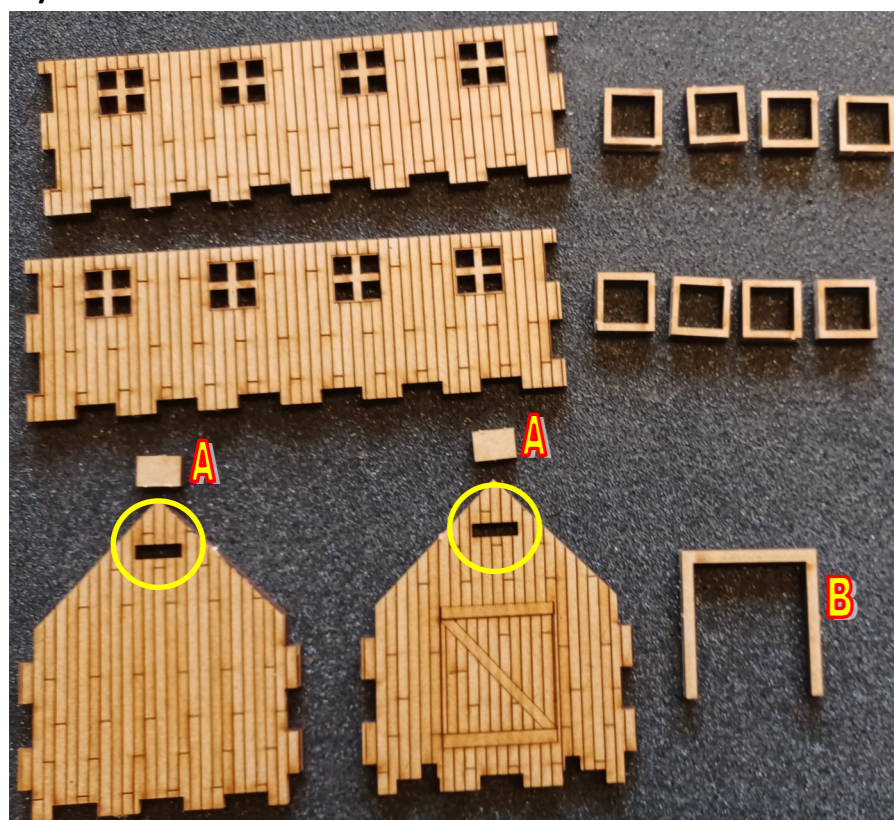

2 A: Glue together shown pieces to make the chimney for the building.

2 B: Cut the bottom diagonally on the chimneys front side. (Yellow circle).

3: Glue together shown pieces. Add window frames to the building. Glue pieces A into the hole in the gable (yellow circle). Make sure that part A sticks out 3 mm on the inside of the gable. Leave out the door frame (Part B) for now.

10: Glue door frame on to the front of the building.

European version.

Model is finished.

Pacific Island version.

# Assembly Instructions for "Wooden Barracks—Military Camp"

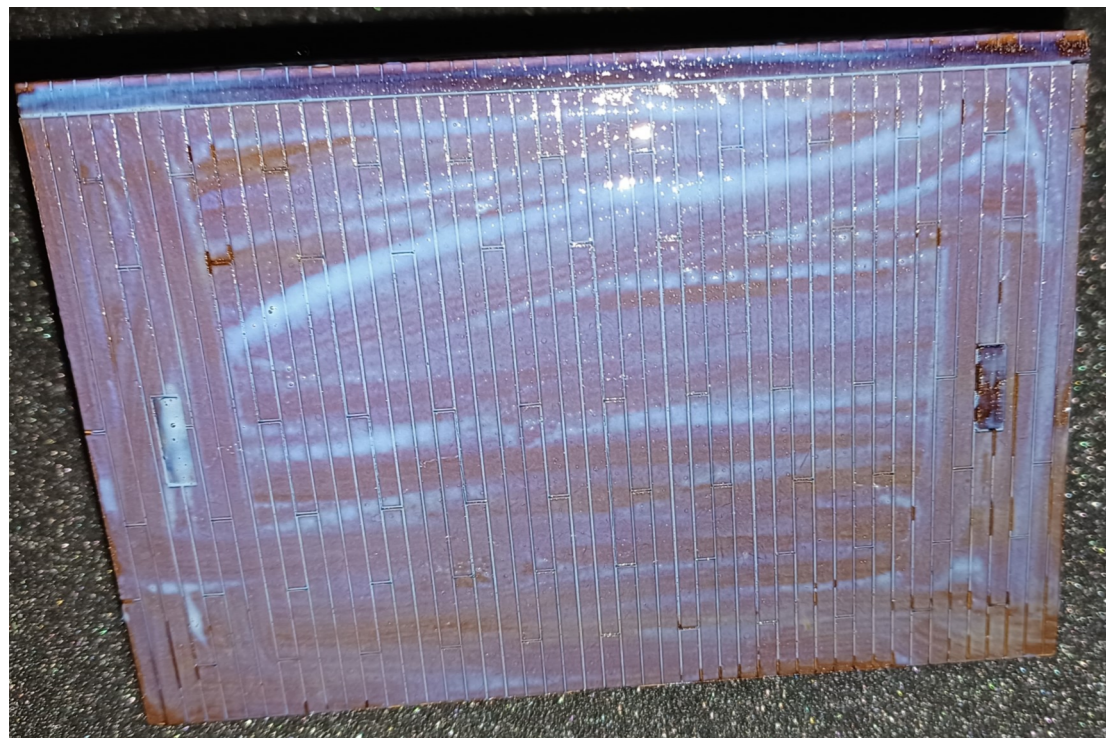

**OPTIONAL:** If you want the barracks to look more like a Pacific Island wooden jungle hut, then follow these instructions to alter the look of the roof.

**1: Cover the hole in the roof for the chimney with a piece of tape.**

**2: Smear the roof with PVA glue.**

**3. Sprinkle on fine sand.**

**4. When dry, paint it in kakhi, army green and brown colours. Let paint dry, and add PVA glue on various parts of the roof, and then sprinkle on static grass, and let it dry.**
