1. Unpack the camera

The accessories included in your Project Nursery® WiFi camera package are:

- (2) Mounting screws
- (1) 10’ charging cable
- (1) Power adapter

The accessories:

2. Position the camera

Place the camera on a flat surface, like a dresser or shelf, or mount the camera to a wall using the keyhole slots on its bottom. For best results, look for a location with at least 50% strength to use the WiFi camera. For best results, look for a location with at least 50% strength to use the WiFi camera. For best results, look for a location with at least 50% strength to use the WiFi camera.

3. Test your WiFi signal

Children have STRANGLED in cords. Keep this cord out of reach of children (more than 3ft (0.9m) away). Never use extension cords with AC Adapters. Only use the AC Adapters provided. 4. Pair the Project Nursery camera with the App

Move the Project Nursery camera to a location where it will be within range of the WiFi network you want to test. Your Project Nursery® WiFi Camera needs a strong enough signal from your WiFi router to send its video signal. Here’s how to test it:

- First, go to where you want to put the camera.
- Plug in the camera jack on the back of the camera. Make sure your smartphone or tablet is connected to the WiFi network you want to test.
- Press the Power button on the right side of the camera (the camera’s LED lights will automatically turn on). The App will prompt you to make sure your phone or tablet is connected to your WiFi network. If your phone or tablet is not connected to your WiFi network, you will see a message asking you to reconnect. Once you have connected your phone or tablet to your WiFi network, you will see the WiFi camera. Position the WiFi camera:

5. Install the App on your phone

Find the Project Nursery Monitor App icon on your phone or tablet. Make sure the Project Nursery App is open on your smartphone or tablet. In the App’s home screen, press the Add new camera with WiFi icon to start, then follow the prompts to set up your camera. If you haven’t already turned your camera on, press the Power button on the right side of the camera (the camera’s LED lights will automatically turn on). If you haven’t already turned your camera on, press the Power button on the right side of the camera (the camera’s LED lights will automatically turn on). If you haven’t already turned your camera on, press the Power button on the right side of the camera (the camera’s LED lights will automatically turn on). If you haven’t already turned your camera on, press the Power button on the right side of the camera (the camera’s LED lights will automatically turn on). If you haven’t already turned your camera on, press the Power button on the right side of the camera (the camera’s LED lights will automatically turn on).

6. Create a Project Nursery user name and password

Once you’ve finished setting up your camera, you’ll need to create a user name and password, the App will ask you to Login with your user name and password. Here’s how to set up your account:

- Press the Register button on the right side of the camera (the camera’s LED lights will automatically turn on).

7. Add Camera

The next screen in the App is where you can add a new camera to your Project Nursery® WiFi Camera system. If you need to add a new camera, press the Add Camera button in the upper right corner of the screen. In the App's home screen, press the Add new camera with WiFi icon to start, then follow the prompts to set up your camera. If you haven’t already turned your camera on, press the Power button on the right side of the camera (the camera’s LED lights will automatically turn on). Continue on other side...
1. Your camera should be plugged in and turned ON.

2. After you've entered your WiFi info below, press "Next" to hide or display text.

   **Helpful Hint:** Click on the lock icon in the password area if your WiFi SSID does not have a password, you will need to create one. This is for your safety and security. Consult the information from your WiFi router. See step 3 for more details.

3. Press the "SET" key on the bottom of your camera for 1 second. You will hear one beep and the LED will start flashing red. This is your gateway to total control of your home WiFi network.

4. Once the WiFi camera has connected to your WiFi network, you'll see the Success screen in the App and the indicator light on the back of the WiFi camera starts blinking green. The LED on the bottom of the WiFi camera starts flashing—the camera is trying to join your WiFi network. This can take 2–3 minutes to complete.

5. Enter the name (WIFI SSID) and password of your WiFi network in the Project Nursery WiFi camera. The App will ask you to press the part of the home screen that shows you the image from your WiFi camera. Pan/Tilt the camera to focus on the area you want to use.

   **IMPORTANT:** If your WiFi SSID does not support hidden SSIDs, the camera will not connect. Once you've finished entering your network name and password correctly—these must match the WiFi network you want to use. Make sure that Wi-Fi signal is 2.4GHz. The Project Nursery WiFi camera does not support 5GHz WiFi.

6. Please test your WiFi network with other devices to make sure that it is working properly. If you're still experiencing issues, consult the WiFi setup process by pressing and holding SD card (not included) for storage of information.

   **Helpful Hint:** Connect to the network after you've added MAC address to router whitelist.

   **Helpful Hint:** If you're unable to connect to any WiFi network, try resetting your camera to set up connection again.

   **Helpful Hint:** Press and hold SET key for 10 seconds. The camera successfully added to your camera!
