02 / Operations

1) Clean up

Clean the tank and reservoir lid. Do not flush the metal contacts directly or soak in the water. Soak the filter in the water for 1-3 minutes. Clean the body using a dry cloth.

2) Fill up

Pour water into the tank. Do not exceed the max water level. * The first time after fill-up, the pump will automatically extract the air before it pumps water. In this process. the water flow will gradually increase

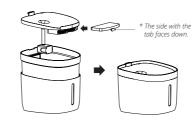

4) Power on

Connect the USB cable to a 5V/1A power supply, then connect A/C adapter to the wall outlet. The fountain starts working, after the indicator flashes in red and blue alternatively once.

3) Assemble

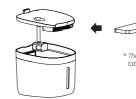

Please put the tank, reservoir lid and filter the right places according to the illustration.

5) Filter replacement

It is recommended to replace the filter every 30 days.

* Soak the filter in the water for 1-3 minutes
