I bought a chain-smoker's car with 150,000 miles and 10 years of continuous smoking. The car was unbearable inside, but mechanically perfect and priced right. I tried detailing, shampooing, vinegar on the hard surfaces, but the car still stank. Then I used autoSHOCKER, and the cigarette smell was totally eliminated! That was six months ago and the smell has not returned. Great product!

We have a semi-truck with a driver who was asked not to smoke in the truck, he ignored our request and it smells horrible. I found this product during my Google search and it did what it promised, the truck smells great and definitely worth the price, just follow the directions. This is a wonderful product!

I'm happy to report the product worked just as you said! The smell is gone! I was unable to even ride in the car without having a reaction from the smoke. I spent \$\$\$\$ on other products and other cleaning hints I'd read on the web but none worked, desperate, I told my husband I was going to gamble on your product and hope it worked. I had read the testimonials and they seemed honest so I gave it a try! Thanks!

When searching for a solution to a "smelly" Toyota Camry, I came upon your website and decided to try it due to the testimonials on the site. Before trying it, I attempted one more try from Toyota with great results. The problem was that one of the four drain hoses that drain water from the roof and sunroof area was not attached, and water was leaking into the back seat area and the foam in the seat was absorbing this water. After correcting the problem, I placed your Auto Shocker into the car, and followed your simple directions. The results were wonderful. The original "stink" due to the water problem is gone, and the car smells very clean. You have a great product, thanks very much for the help.
