

# Cost-Effective. Safe. Quick Acting. Easy Use.

## The Difference:

### What makes our products different from any other odor elimination solution?

Active chlorine dioxide, the main ingredient in all our products is what sets us apart and makes our products head and shoulders above all other odor elimination products in the market today!

Active Chlorine Dioxide, also known as ClO<sub>2</sub>, not to be confused with chlorine because they are very different, is one of the strongest, yet safest, odor elimination tool known. It has been around for over 70 years and used in large industrial applications, where it could be generated in large volumes as a gas or liquid solution. One of its most common uses is to remove severe industrial toxic odors. However, due to the fact that in a liquid state the shelf life is very short, it had to be made at point of use through large and expensive equipment. This made it cost prohibitive to bring to a more commercial market place.

This is no longer the case thanks to ***ClO<sub>2</sub>-DMG technology™!***

The secret lies in the new revolutionary technology, small, portable and disposable, chlorine dioxide delivery system called ***ClO<sub>2</sub>-DMG technology™*** (ClO<sub>2</sub> for chlorine dioxide and DMG for disposable micro generator) developed by our partners at CLOO Labs Inc. exclusively for Biocide System's Bioshocker™ line of products.

Our Bioshocker™ line of products will deliver a chlorine dioxide gas that expands throughout any enclosed space. The ClO<sub>2</sub> gas will penetrate deeper and more effectively than other non gas products, permeating every nook and cranny without harming any soft or hard surfaces and without leaving any harmful residue. The chlorine dioxide molecules are attracted to the odor causing molecules, like a magnet is attracted to iron. It will literally seek out the odor causing molecules and oxidize them, destroying the odor effectively and permanently, which results in a restored, safe, healthy, clean, odor free environment.

Thanks to our exclusive relationship with CLOO labs Inc. our products are the first and only products on the market that can deliver the non-toxic super odor eliminating power of Chlorine dioxide in a gas or liquid solution to the commercial sector. We are completely revolutionizing the odor elimination industry.

### What does that mean to you the commercial sector?

It means you, now have access to a cost-effective solution that is non-toxic, quick acting, safe and easy-to-use, and has the odor elimination power like no other product before it.

It will easily, safely and quickly get rid of odors caused by cigarette smoke, pets, organic and chemical compounds, mold and mildew and any other source.

Also, a very important factor is that companies that use our products can feel good about doing their part in keeping green and supporting American-made products.

Unlike ozone machines, aerosol products and masking agents, the ClO<sub>2</sub>- DMG technology™ is made up of 100% biodegradable materials and the chemical formula breaks down to a salt water solution. Furthermore, it does not release any carcinogens or VOCs (volatile organic compounds) into our atmosphere, leaving no carbon footprint and making this product, as eco- friendly as they come. And last but definitely not least, everything about this product is 100% made in the United States of America.

**Biocide Systems™**

# Room Shocker™

## Exclusively using ClO<sub>2</sub>-DMG Technology™

### Maximum Strength Odor Elimination

Hospitality . Real Estate . Apartment . Office . Warehouse

Permanently eliminates odors caused by: Cigarette Smoke, Pets, Mold, Mildew, Bacteria, Paint, Spoiled food, Vomit, Urine or any other Organic and or Chemical Compounds.

- Deodorize an enclosed space of up to 400 ft.<sup>2</sup>, based on an 8 ft. ceiling.
- Not a masking agent - will Bio-Shock™ and destroy odors permanently.
- Penetrates deeper and more effectively than other non gas products.
- Seeks out odor molecules like a smart bomb and destroys them.
- Fast Acting - will completely eliminate odors in as little as 4 hours and a maximum of 12 hours depending on severity.
- Easy to use - Simply shake add water and walk away - requires no hazardous material safety equipment.
- Non Toxic - Leaves no harmful residue to clean up and is non-carcinogenic.
- Cost effective - Non labor intensive, reducing man-hours and bottom line.
- Stronger and safer than ozone machines or any other odor elimination product on the market today.
- Eco-friendly - Non-aerosol and 100% biodegradable and releases no VOCs or carcinogens into our environment.

**Commercial . Institutional . Industrial**

# Auto Shocker™

## Exclusively using ClO<sub>2</sub>-DMG Technology™

### Maximum Strength Odor Elimination

Pre-Owned . Auto Rental . Auto Detail . Tour & Charter . Fleet . Recondition . Collision

Permanently eliminates odors caused by: Cigarette Smoke, Pets, Mold, Mildew, Bacteria, Paint, Spoiled food, Vomit, Urine or any other Organic and or Chemical Compounds.

- Permanently deodorize any car interior in excess of 300 cubic ft.
- Not a masking agent - will Bio-Shock™ and destroy odor at the source.
- Penetrates deeper and more effectively than other non gas products.
- Seeks out odor molecules like a smart bomb and destroys them.
- Fast Acting - will completely eliminate odors in as little as 4 hours and a maximum of 12 hours depending on severity.
- Safe for all automotive interiors.
- Easy to use - Simply shake add water and walk away - requires no hazardous material safety equipment.
- Non Toxic - Leaves no harmful residue to clean up and is non-carcinogenic.
- Cost effective - Non labor intensive, reducing man-hours and bottom line.
- Stronger and safer than ozone machines or any other odor elimination product on the market today.
- Eco-friendly - Non-aerosol and 100% biodegradable and releases no VOCs or carcinogens into our environment.

# ClO<sub>2</sub> Liquid Shocker™

## Exclusively using ClO<sub>2</sub>-DMG Technology™

*Delivering the Power of Chlorine Dioxide  
For The Toughest Levels of Odor Management  
Without The Negative Impact To Our Environment And Personal Health*

## Commercial . Institutional . Industrial

- Effective against odors caused by Bacteria, Mold, Mildew, Fungi, Vomit, Urine, Paint or any other Organic and or Chemical Compounds.
- Effective in open spaces as well as enclosed.
- Easy to activate - simply place pouch in water, no equipment necessary.
- Easy to target specific areas that need ClO<sub>2</sub> concentration.
- Fast Acting - generates liquid Chlorine Dioxide solution at 50 to 100 ppm in 10-15 minutes.
- Applied by - mopping, spraying, soaking, dipping and flooding
- Non-toxic - requires no hazardous material safety equipment and leaves no harmful residue to clean up.
- Cost effective not labor - intensive reducing man hours and bottom line.
- Eco-friendly - Non-aerosol, 100% biodegradable and releases no VOCs or carcinogens into our environment.

## A FEW FACTS ABOUT CHLORINE DIOXIDE ALSO KNOWN AS ClO2

### What is Chlorine Dioxide?

Chlorine Dioxide was first discovered in 1811 by Humphrey Davy. Chlorine dioxide (ClO<sub>2</sub>) is a gas with strong oxidizing properties. An “oxidizing agent” removes electrons from reactive molecules. By this process, ClO<sub>2</sub> quickly neutralizes and eliminates odors.

Today, ClO<sub>2</sub> is primarily used in municipal water supplies, especially those with odor and taste problems. It is also extensively used as a bleaching agent in the pulp and paper industry instead of chlorine, since chlorine was found to produce carcinogens. Some newer applications for ClO<sub>2</sub> include the treatment of medical waste and the seafood canning industry. Until recently, however, chlorine dioxide was not available for use on a “small-scale” because the gas must be generated at the point of use and could not be easily transported.

### Is chlorine dioxide safe?

The Niagara Falls New York water treatment plant first used chlorine dioxide for drinking water in 1944. Currently, there are approximately 400 -500 water treatment plants in the United States and over 1000 in Europe utilizing ClO<sub>2</sub> in municipal drinking water systems. Numerous studies have shown chlorine dioxide, when used at the appropriate concentrations, has no adverse health effects, either by skin contact or ingestion.

### What's the difference between chlorine and chlorine dioxide?

While chlorine dioxide (ClO<sub>2</sub>) has chlorine in its name, chlorine dioxide's chemistry is different from that of chlorine. Unlike the more common chlorine, chlorine dioxide, at appropriate concentrations, is non-mutagenic, non-carcinogenic, and relatively non-irritating. When ClO<sub>2</sub> is added to water, it dissolves without ionizing. Or more specifically, when exposed to water, ClO<sub>2</sub> does not release a chlorine atom to form hydrochloric acid as does chlorine, nor does it combine with organics to form chlorinated hydrocarbons, which are carcinogenic.

One atom can make all the difference --- just as hydrogen is an explosive gas, but when combined with oxygen becomes dihydrogen oxide - commonly known as water (H<sub>2</sub>O).

### What is the difference between “Active” chlorine dioxide and “Stabilized” chlorine dioxide?

Stabilized chlorine dioxide is a misleading term that is unfortunately in widespread use. There are only trace amounts of chlorine dioxide in “stabilized chlorine dioxide” products. The correct description is “stabilized chlorite.” The chlorite is stabilized with a buffer and peroxide at a pH of about 7. In order to generate a meaningful level of chlorine dioxide in a stabilized chlorite product, either chlorine or a strong acid must be added. Though chlorite, or stabilized chlorite, is also an oxidizing agent, it is not nearly as powerful as chlorine dioxide. Chlorine dioxide, unlike chlorite, is a gas that must be generated at the time of application by mixing 2 separate parts.

## TESTIMONIALS FOR AUTO SHOCKER™

These testimonials are all from actual customers who left comments on our blog.

### **Susan Wait says:**

December 9, 2011 at 9:14 pm

*ABSOLUTELY INCREDIBLE! I used the auto shocker and it worker perfectly! I can not express how impressed and pleased I am !!! Now trying to buy the home product but alas is out of stock...PLEASE BE IN STOCK SOON !!!! I RECOMMEND, RECOMMEND, RECOMMEND !!!!!*

### **Steve says:**

October 28, 2011 at 9:36 pm

*I bought a chain-smoker's car with 150,000 miles and 10 years of continuous smoking. The car was unbearable inside, but mechanically perfect and priced right. I tried detailing, shampooing, vinegar on the hard surfaces, but the car still stank. Then I used autoSHOCKER, and the cigarette smell was totally eliminated! That was six months ago and the smell has not returned. Great product!*

### **Leanne Fiddler says:**

February 7, 2012 at 8:04 pm

*We have a semi-truck with a driver who was asked not to smoke in the truck, he ignored our request and it smells horrible. I found this product during my Google search and it did what it promised, the truck smells great and definitely worth the price, just follow the directions. This is a wonderful product!*

### **Mrs. Fleming says:**

September 13, 2010

*I'm happy to report the product worked just as you said! The smell is gone! I was unable to even ride in the car without having a reaction from the smoke. I spent \$\$\$\$ on other products and other cleaning hints I'd read on the web but none worked, desperate, I told my husband I was going to gamble on your product and hope it worked. I had read the testimonials and they seemed honest so I gave it a try! Thanks!*

### **Michael A. Crosby says:**

December 3, 2011 at 1:22 pm

*When searching for a solution to a "smelly" Toyota Camry, I came upon your website and decided to try it due to the testimonials on the site. Before trying it, I attempted one more try from Toyota with great results. The problem was that one of the four drain hoses that drain water from the roof and sunroof area was not attached, and water was leaking into the back seat area and the foam in the seat was absorbing this water. After correcting the problem, I placed your Auto Shocker into the car, and followed your simple directions. The results were wonderful. The original "stink" due to the water problem is gone, and the car smells very clean. You have a great product, thanks very much for the help.*

## TESTIMONIALS FOR ROOM SHOCKER™

These testimonials are all from actual customers who left comments on our blog.

### **David Dodge says:**

February 12, 2012 at 8:31 pm

*I ordered the room shock quick release treatment in order to deal with the cigarette smoke odor left by a tenant who had smoked in a rental apartment for nearly two years. After scrubbing down the walls and ceilings and repainting, and then throwing away the blinds, light bulbs, carpeting, and anything else that was removable, the apartment still smelled of cigarettes. I used room shocker in each room of the apartment over a three day period, and I could not thereafter detect any lingering smell of cigarettes. Good product!*

### **Adrienne Araoz says:**

May 9, 2011 at 8:51 pm

*We had a feral cat that entered our summer trailer and used it as a litter box all winter long. When we went to open the trailer in April, we almost died from the smell!! We cleaned everything up, but the urine odor was so strong we thought it was hopeless. I came across your site when I googled "my house smells like cat pee" and one woman said she used for skunk odors. Then I started googling room shocker and read about it. This was our last hope!! It worked beautifully. It is over a month now and the odor has not returned!! Thank You for making such a wonderful product. I wish you would sell it at Pet Smart or a Home Depot. Thank You so much again!!*

### **Vin Klim says:**

May 21, 2011 at 12:30 am

*I used the Room Shocker a few months ago. Really thought I wasted my money. And it's not cheap! I had a musty/mildew smell in my bedroom for over a year. Tried everything, bleach, household sprays, bottles of borax, and too many other remedies that didn't work. We set a Room Shocker up in the bed room and went shopping for about 6 hours. Came back and not only was the odor gone but the room smelled really great. Of course we vented the room before sleeping in it. I would recommend this for anyone needing to get rid of any odor. I'd almost want to get sprayed by a skunk to see if that one works:) If you got an odor you want to get rid of use this stuff, it really works. Vinny*

### **Brenda says:**

August 30, 2011 at 4:56 pm

*I recently quit smoking. After being quit for a while I started to smell a lingering smoke odor in my car. I saw the money back guarantee and decided to try it. To my amazement, my car still smells fresh with no smoke odor after several days. Well worth it. Thanks.*

### **Bryant Sole says:**

April 14, 2009

*Trying to sell my house, I received comments that the odor of cigarette smoke in the house was a deterrent for potential buyers. After considering other expensive conventional methods of odor elimination, I researched the problem on line. Purchased RoomShocker on line and I'm amazed at the results. All odors have been completely removed. And the process is so simple. It is an unusual pleasure to find a product which does exactly what it's promoters claim. Congratulations on a fine product!!*
