auto®**

向更安全的世界不斷前進

Babyauto 是西班牙 Babyauto Group 集團旗下專營嬰幼兒汽車安全座椅的明星品牌，為孩子的安全出行提出高品質保證。Babyauto 二十年以來每日都在努力提高兒童在車輛中的安全。

安全概念包含許多不同方面，雖然我們大多數人越來越意識到旅行時安全的重要性，但仍有許多國家認為這是一個陌生的概念。因此，我們對幫助人們理解這些價值觀重要性的社會行動的承諾與我們的實驗室和工程師正在進行的R+D項目同樣重要。

Passionate about Child Safety

Belongs to Spain Babyauto Group. Babyauto is a pioneer in child restraint technology for over 20 years. We are passionate about Child Safety and strive to continuously design and develop car seats that give safety and comfort so that your smallest passengers do not face any unnecessary risks on the road.

The concept of safety encompasses many different aspects, and while most of us are becoming increasingly aware of the importance of safety while travelling, there are still many countries where this is an unfamiliar concept. For this reason our commitment to social actions that help people understand the importance of these values is as important as the R+D projects being carried out by our laboratories and engineers.

只挑選 最適合您小朋友 的汽車安全椅

兒童汽車安全約束系統

應以「這汽車安全椅是否最適合我的小孩？」為前題，最理想的安全約束系統應由座椅配合兒童的成長形態為首，接著考慮座椅是否能有效安裝到車輛上和易於使用。細心查看每張安全椅上都應清楚標記的ECE標籤，確保座椅的組別範圍與兒童的體重相符，孩子目前的體重才是決定座椅最佳安全水平的指標。因此，我們不應選購太大或不符合小孩體重的座椅；只選最適合您小朋友的汽車安全椅，是安全出行至關重要的第一步。

汽車安全椅皆符合ECE標準中提到的不同組別，根據孩子的體重和成長階段而設計

0+ 0至13公斤 由初生至大約12個月

1 9至18公斤 由大約9個月至大約4歲

2/3 15至36公斤 由大約4歲至大約12歲

CHOOSING THE RIGHT CAR SEAT

Child restraint systems

The most appropriate seat for each child adapts best to their morphology. It is fundamental to ensure that the seat is compatible with the child's weight right from the first day it is used and that it bears the ECE label that should be clearly marked on each seat.

The child's weight currently dictates the optimum security level that car seat system manufacturers should meet. Therefore, if we want to ensure our child's safety, we should never buy a seat that is too big or that does not suit their weight.

All our seats comply with the different groups mentioned in the ECE standard, according to the child's weight and growth stage.

0+ From 0 to 13 kg. From birth to 12 months approximately.

1 9-18 kg. From 9 months to 4 years approximately.

2/3 15-36 kg. From 4 to 12 years approximately.

於撞擊測試中，對比使用車輛安全帶安裝的汽車安全椅，以 ISOFIX 標準接口安裝表現出較敏捷及平均的減速作用，令幼童頭、頸承受較少衝力，減低受傷機會。

ISOFIX 繫固系統

ISOFIX 是一種錨固系統，能確保座椅可快速安全地安裝在車輛中。自2006年以來，所有車輛都使用 ISOFIX 和頂部勾索連接安裝，以固定椅子的頂部，防止汽車椅向前傾斜和轉動。

即使是以車輛安全帶安裝的汽車椅，加入 ISOFIX 錨固系統都能大大減少了安裝誤差。這顯然可以保證為孩子提供更好的保護，並有利父母更容易正確使用汽車安全椅。

ISOCLICK FIX® 繫固系統

ISOCLICK FIX® 是一個簡單的系統，與 ISOFIX 系統一樣，使用車輛的固定點來固定座椅。

它被設計為完善補充組別 I 的汽車椅的安裝方法，令汽車椅可以車輛安全帶與 ISOCLICKFIX® 繫固車輛中，使汽車安全椅具有極佳的穩定性和額外的保護，減低兒童受到的衝擊力。

至於組別 II 及 III 的汽車安全椅，儘管兒童直接由汽車安全帶固定，但仍強烈建議使用 ISOCLICKFIX® 固定裝置：

- 可以防止汽車安全椅於側面受衝擊時發生擺動的影響。
- 車輛經過彎道時移動較少。
- 在發生正面碰撞時，它可以防止汽車安全椅在未被佔用時向前傾斜。

Car seats equipped with the isofix attachment system have a lower deceleration level than those installed using the vehicle seatbelt. Your child will withstand a lower pushing force in the event of a head-on collision.

ISOFIX fastening system

ISOFIX is an anchoring system guaranteeing that a seat can be fitted in the vehicle quickly and securely. Since 2006, all vehicles have been fitted using ISOFIX and a top tether to fasten the top of the chair and prevent the chair pitching forwards and turning.

The seat's anchoring system considerably reduces fitting errors whenever the vehicle seatbelt is used to hold the seat in place. This clearly guarantees greater protection for the child and makes it easier for parents to use it.

ISOCLICK FIX® fastening system

ISOCLICK FIX® is a simple system that, like the ISOFIX system, uses the vehicle's anchoring points to hold down the seat.

It is designed as a complement for group 1 seats that are installed using the vehicle seatbelt. This fitting combines the car seatbelt with the ISOCLICK FIX® fastening, giving the seat great stability plus extra protection as the child receives less impact force.

For groups 2 and 3, although the child is held directly by the car seatbelt, ISOCLICK FIX® anchoring is still highly recommended:

- It prevents the seat from swinging in the event of a side impact
- Less movement on bends.
- It prevents the seat or booster from pitching forwards when unoccupied in the event of a head-on collision.

兩邊加強防護

近年汽車椅設計越來越重視側面保護，因為在發生事故時側面保護對兒童至關重要。汽車安全椅通常安裝在車門旁邊，因此兒童會「直接」暴露於側面碰撞意外之中。因此，我們最新的汽車安全椅包括靠背側面，都加固了側面系統和頭枕，以保護兒童身體最脆弱的部份。這層EPS泡沫起到屏蔽作用，吸收並最大限度地減少碰撞的影響。

SIPS · 側面碰撞保護系統

這是一種保護系統，其作用於第一階段吸收側面衝擊碰撞產生的能量，包括椅子側面的緩衝，可調節只在最靠近車門的一側使用，讓另一側乘客有更多空間。

i-size 標準

這符合歐洲經委會批准的新的 ECE R129 標準，該標準延長了孩子被要求後向乘坐直至15個月。Babyauto Group 支持這一項新標準，因為它代表了兒童汽車安全的改進。我們目前正在開發新系統，以遵循包含 i-size 標準的指南。

Strengthened sides

Increasing importance is given to side protection as it is vital to protect children in the event of an accident. Car seats are usually fitted next to the car door so the child is "directly" exposed in the event of a side collision. Consequently, our latest seats include reinforcement systems on the sides of the backrest and the headrest to protect the most sensitive areas of the child's body. This is a layer of EPS foam that acts like a shield to absorb and minimize the effect of the collision.

SIPS. Side impact protection system

This is a protection system that acts in the first phase of a side impact absorbing part of the energy that is produced during the collision. It consists of cushioning on the chair sides that can be adjusted to use on the side closest to the door, removing it from the opposite side to give the other passengers more space.

i-size standard

This complies with the new ECE R129 standard approved by the UNECE which extended the age when the child is required to travel with his/her back to the direction of travel up to 15 months. Babyauto Group supports this new standard as it represents an improvement in child safety in cars. We are currently developing new systems to follow guidelines incorporating the i-size standard.

R+D+I = 生命尤關的 安全科技

試驗和碰撞實驗

作為直接參與兒童安全的公司，我們所有的產品都經過了最嚴格的碰撞測試。事實上，我們對兒童汽車安全椅的規格測試比現行 ECE R 44/04 標準的要求還要高。我們會定期對每個產品的代表性樣品進行碰撞測試，以確保結果符合標準。因此，我們可以在幼兒的安全性和舒適性方面保證產品的持續質量。

R+D+I = SECURE TECHNOLOGY

Trials and collision tests

As a company directly involved in child safety, all our products are submitted to the strictest collision tests. In fact, our seat compliance tests are much more demanding than any required by the ECE R 44/04 standard in force. Periodically, we take representative samples of each of our products and we run collision tests to ensure that results remain within the standard. We can thereby guarantee continuous quality for our products both in terms of safety and comfort for babies

TESSA / MOTORLAND 科技園 汽車安全系統的科技實驗室

在西班牙阿爾卡尼斯省 MOTORLAND 科技園的 MOTORLAND 環行道路設備中，有一組旨在不斷改進兒童乘車安全的設施。該設備屬 Babyauto 和薩拉戈薩大學共同研討，是雙方在 R+D+I 方面進行合作的產物。

TESSA 是位於該科學園的一個汽車安全技術和系統實驗室，該實驗室所進行的大部份工作是進行撞擊試驗，以測試影響汽車安全、其他道路使用者之不同因素。目前，TESSA 正在開展一項關於撞擊生物力學的研究，並因此被認為於道路安全方面擁有最佳培訓的教育中心之一，在國際上享有很高的聲譽。

通過這些配備有最先進的正面和側面撞擊測試系統的設備，我們對自己的產品進行測試，以便進行持續性研發，並確保目前所銷售產品的質量。

TESSA / MOTORLAND. Technology laboratory for automotive safety systems

The Motorland circuit facilities (Alcañiz) include the Motorland Technology Park of Aragón (Technopark), a facility where the University of Zaragoza and Babyauto Group work together on R+D+I to continuously improve parts involved in child car safety.

Based in this technology park, TESSA is the technology and systems laboratory for automotive safety. Much of its work focuses on running impact tests on components and systems that affect safety for cars, their occupants or other road users (motorbikes, pedestrians, etc.). TESSA is currently developing research on impact biomechanics which is earning them great international prestige as one of the best training and educational centres on road safety.

In these facilities, fitted with the latest systems for both head-on and side-on crash tests, we run our tests to continue developing our products and ensure quality for products currently on sale.

一張座椅，為孩子帶來十二年的安全承諾

The chair that will accompany your child up to 12 years.

全新登場的 UNIT FIX 0123 汽車安全椅，以追趕嬰孩飛快成長的需要作設計概念，迎合初生嬰兒至12歲孩子的汽車安全需要：後向安裝直至18個月大、五點式安全帶、Isofix 及 top tether 連接器、可傾斜的座位、加強兩側防撞保護、以及漸進式調節的頭枕。

UNIT FIX is the new car seat designed and developed to grow as fast as your child, from birth to age 12. Rear facing position until 18 kg for babies, 5-point harness, Isofix / top tether connectors, reclining positions and side-impact protection, plus simultaneous regulation of harness and headrest.

UNIT FIX 0123

Isofix + Top tether 標準接口

4歲前，以國際化標準的Isofix接口簡易安裝UNIT FIX，並輔以top tether 頂部連接器固定汽車安全椅，全面穩定幼童的安全。

Isofix + Top tether

For Group 1, UNIT Fix seat combines the universal Isofix anchorage system with a third top tether anchorage point that limits the rotational movement of the seat.

一張座椅，四個階段，十二年的安全出行

舒適的頭枕可漸進式調節，以最適合的高度迎合幼兒不同高度的需要。

1 seat, 4 stages, 12 years

Headrest is adjustable in height adapting to the child's growth.

兩側防撞保護

特別加強兩側防撞的設計及物料，從背部及身體兩側加強防護力，保護幼童的重要器官。

Side impact protection

The chair's backrest and headrest sides give it excellent protection in the case of side impact.

可傾斜座位

UNIT FIX 備有3個角度可調，於旅途上無論是看風景或是小睡片刻，實實都能以最舒適的角度渡過。

Recline positions

Unit fix seat features 3 positions that can be adjusted at any moment so the child travels comfortably either asleep or awake.

一張座椅，為孩子帶來十二年的安全承諾

WERDU PLUS 覆蓋所有兒童汽車安全椅年齡組別，只需一部汽車安全椅便可陪同孩子直至12歲。靈活性強的 WERDU PLUS 可安裝在任何備有三點式安全帶的汽車中，並加有 IsoClick Fix 安全接口可兼容 IsoFix 標準接口，提高安全屬性。

The chair that will accompany your child up to 7 years.

WERDU PLUS is a highly versatile seat that covers all the child safety seat groups. In other words, it adapts progressively to the growth of the child (up to 36 kg) without the need for a new seat. WERDU PLUS combines mixed installation using the 3-point vehicle safety belt in conjunction with the Isoclick Fix® connectors for extra safety.

IsoClick Fix 連接系統的輕便汽車安全椅

Isoclick Fix® fixation, extra comfortable cover.

實用舒適，可以輕鬆快速地安裝在任何車輛上，具有可於不同車輛之間轉換使用的優點，得益於其 IsoClick Fix 連接器，只需輕輕一按，即可穩定地安在車內。特別織物結構的坐墊面料透氣度高，提高使用幼童使用舒適度。

Practical and easy to transport, this booster can be quickly installed in any vehicle. Thanks to its Isoclick Fix® connectors the seat can be installed with total stability with just one click. The contact area of the seat features a grid-structured fabric that favors air circulation and prevents the area from heating, thereby offering an extra degree of comfort.
