

Accuracy International® Announces New Model AX Series Rifles for 2014

January 14, 2014

Portsmouth UK- Accuracy International (AI) is pleased to announce the latest addition to a long line of combat proven sniper rifles, the 2014 AXMC rifle system and AX308. The AXMC (AX Multi Calibre) advanced technology weapon system provides military, law enforcement and civilian shooters the latest in AI's long line of battle proven features: accuracy, reliability, ruggedness and unrelenting quality.

At the core of the AXMC series of rifles is the combat proven Accuracy International machined solid steel, flat bottomed action, epoxy bonded and bolted to a combat tested AI chassis. The AXMC is a user configurable, mission adaptable, long range sniper system available in 308/7.62 NATO, 300 Winchester® Magnum and 338 Lapua® Magnum. A stand-alone AX308 is available in 308/7.62 NATO. The latest performance enhancing features include:

- Proofed steel action featuring AI's patent pending Quickloc quick release barrel system and 20 or 30 MOA STANAG 4694/Mil Std 1913 action rail.
- Quickloc match grade, stainless steel barrel.
- Muzzle brake.
- 6 lug, 60 degree bolt with AI combat proven leaf spring extractor.
- 3 position safety.
- AI's world renowned two stage trigger.
- Right folding stock with adjustable cheek piece and length of pull.
- AI's patent pending KeySlot™ accessory mounting system with full length top rail to match the action rail and three accessory side rails (1 x 140mm plain, 2 x 80mm flush cup).
- Configurable pistol grip.
- Side cut away magazine well for smooth, rapid magazine changes.
- Detachable AI 10-round double stack magazines; compact, reliable and can be loaded though the rifle ejection port.
- The AXMC is available in black or green stock sides with black metalwork or pale brown stock-sides and metalwork.

14th January 2014
