Vol. 1.00 EN

#### WATER RESISTANCE

Note that the water resistance chart serves only as a guide (please refer to the water resistance chart on the next page). Actual water resistance may vary depending on a number of factors including water temperature, water salinity and use under water. The water resistance of your timepiece may eventually be compromised over time with general wear and tear and use of your timepiece under adverse conditions.

Always remember to employ the screw down crown if available to maintain the water resistance of your timepiece. Warranty may be voided if the screw down crown has not been properly employed.

Note that you should **NEVER** wear your watch in a jacuzzi, hot shower or steam room where steam may enter the case despite the water tight seals used to protect your watch. This may cause condensation inside your watch, which may effect and damage the inner workings of your watch.

# **AUTOMATIC WATCH**

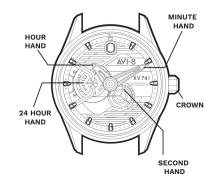

This timepiece is equipped with a self-winding Mechanical Automatic movement.

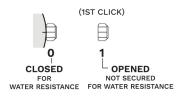

#### It does not need a battery.

It is powered by the motions of the user's own wrist during the wear of the watch. You may also choose to wind the watch manually.

For more details on operating this timepiece please refer to the enclosed booklet or visit:
