# MECA-QUARTZ WATCH

This watch is powered by a Japanese made “Meca-Quartz” movement. It combines a battery regulated engine with a mechanical module. The result is a watch that delivers the meticulous pinpoint precision of a quartz movement along with the smooth sweep seconds hand and visual charm of mechanical watches.

## WATER RESISTANCE

Note that the water resistance chart serves only as a guide (please refer to the water resistance chart on the next page). Actual water resistance may vary depending on a number of factors including water temperature, water salinity and use under water. The water resistance of your timepiece may eventually be compromised over time with general wear and tear and use of your timepiece under adverse conditions.

Note that you should **NEVER** wear your watch in a jacuzzi, hot shower or steam room where steam may enter the case despite the watertight seals used to protect your watch. This may cause condensation inside your watch, which may affect and damage the inner workings of your watch.
