

COMMERCIAL SERIES LINE

Hydro Life 310-HF

The Hydro Life 310-HF Cartridge is a 20-inch spun polypropylene sediment filter designed for use as first line of defense of the 300 Triple-X filtration system. The larger prefilter helps address more severe sediment problems, while maintaining the high flow rate needed for larger ice machines and steamers. A sediment filter is a cost-effective solution to help remove sediment before it reaches the premium carbon filter cartridge, preventing it from becoming clogged and ineffective. Save money on equipment repairs and premium carbon filter cartridge replacement with the Hydro Life 310-HF Sediment Filter Cartridge.

FOR USE IN MODELS:

- **Hydro Life 300-HF** - For larger ice machines and other equipment that require higher flow rates.

REDUCES OR CONTROLS:

- Sediment

SPECIFICATIONS:	310-HF**
Height:	20"
Width:	2 1/2"
Depth:	2 1/2"
Capacity:	Dependent on water conditions*
Flow Rate:	10 GPM 38 LPM
Micron Rating:	25
Working Pressure:	20-100 PSI non shock 1.38-6.89 Bar
Maximum Operating Temp:	100° F / 38° C
Quantity/Case:	6
Certification: TEI-NSF 42 only	✓

* The sediment filter can easily be removed and replaced prior to the HL 350-HF if the incoming water supply is excessively dirty.

** Universal fit for most 10 inch canisters/sumps
