

ESPF - SURGE - PASTURE FERTILIZER FIELD TEST

SURGE is a natural, super concentrated foliar fertilizer for use on pastures and grassland. It is formulated with high grade macro and micro nutrients, plant extracts, amino acids, proteins, vitamins, minerals, complex carbohydrates, etc. **SURGE** can be used alone or in conjunction with chemical inputs in any standard crop management program. **SURGE** offers significant benefits for producers who practice sustainable agriculture. It does not require a withholding period and is safe for use.

**SURGE was applied to the pasture test strip
on May 10, 2008 at approx 7:30 PM.
Photo was taken May 16, 2008 at 8 PM.
Control was not fertilized.**
