Thanks for the quick reply.

Just so you know, I use the Humic Plus on my gardens. Ever since I started treating the property with the Humic Plus, you should see how healthy many of my plants now look, not to mention my aloe vera plants which were once very sick.

You offer a great product for the money. My plants always smile when the ESHP - Humic Plus bottle comes out of the garden shed when my cousin whose been my caregiver over the years goes to water the gardens.

The trace mineral content not only stopped the disease process of two plants, which were always sick on my property, but cut back on the fungal growth on other bushes, as their immunity was greatly boosted using your product. Thanks again for such a lovely product. I'm looking forward to delivery of on the current order.

Thoughtfully  
Kevin M
