## Description of Parts

### Unboxing

To unbox the air purifier, open the box, take out the foam lining, and take out the internal accessories and user manual.

Pull the air purifier out of the box and pull down the plastic covering surrounding it. Keep the product box in a safe location for future use. After clearing the inner packaging of the air purifier, open the base of the air purifier, take out the True HEPA filter and remove plastic packaging.

## How to Replace Filter

\* Note :

- Please remove the packaging from the filter before using it.
- Ensure the product is unplugged before removing or installing the filter.
- Please wipe the dust on the filter regularly, do not wash or use it repeatedly.
- Please do not use other filters that are not designed for this air purifier.

- 1 Unplug the power socket of the machine before replacing or installing the filter. When the power indicator keeps flashing in red, the filter should be replaced

It flashes red if it is used for the first time.  
Operation method: turn on--press the power button until the red light stops flashing--is ok.

- 2 Invert the machine, and rotate the base along the direction marked "OPEN".

- 3 Take out the filter from the machine.

- 4 Remove the packaging of the filter.

## How to Replace Filter

- 5 Install the filter into the machine.

- 6 Then Install the base, rotate and tighten the base along the direction marked "CLOSE"

\* Note  
Failure to properly place the filter and back cover on the air purifier may result in air purifier not working properly.

### Resetting the Filter Replacement Alert

When the air purifier detects that the filter reaches the saturation value, the LED light keeps flashing in red.

After replacing with a new filter, the FILTER REPLACEMENT ALERT needs to be reset. Please restart the purifier and keep pressing the power button until the light stops blinking.

If it is the first time using the air purifier, do not reset it.

### Maximum Purification Efficiency

- Keep 1 ft / 30cm away from where oxygen is being administered.
- To effectively clean air, keep windows and doors closed while the air purifier is on.
- Keep the inside of the air purifier dry. To prevent moisture buildup, avoid placing in rooms with major temperature changes or underneath air conditioners.

## Names and Functions of Control Panel

### Button Description

#### Power Button

1. When turning on the air purifier, the air purifier will beep and the default fan speed will be low
2. Press again to turn off the machine, all lights will be off, then the machine is in standby mode.

H  
M  
L

#### Fan Speed Button

There are 3 options for fan speed. H or High, is the fastest fan speed. M or Moderate, is the second fastest fan speed. L or Low, is the lowest fan speed and most quiet.

##### 1. H Mode (High)

When the machine works in a High Mode, the corresponding indicator will be on.

##### 2. M Mode (Moderate)

When the machine works in a M Mode, the corresponding indicator will be on.

##### 3. L Mode (Low)

When the machine works in a L Mode, the corresponding indicator will be on.

## Names and Functions of Control Panel

<p>8H 4H 2H</p> 	<p><b>Timer Button</b></p> <p>1. To use the timer, press the timer button until you reach desired time. You can select between 2 hours, 4 hours, or 8 hours.</p> <p>2. When the timer is up, the air purifier will turn off the fan and all lights will be on standby mode.</p>
 <p>LIGHT</p>	<p><b>LIGHT Button</b></p> <p>There are three different light brightnesses you can control: standard, dimmed, and off. Push the light button repeatedly until you reach your desired brightness preference.</p>

### Connect the Power

Please confirm that the input voltage is AC120V 60Hz, and ensure that the power plug and your hands are dry before you insert the power cord plug into the outlet.

Note: Contact Customer Service when the power cord or plug is damaged or the power outlet is loose.

We strongly recommend that the damaged parts be repaired or replaced.

To replace the damaged power cord or plug, please visit Aflora website and contact Customer Service.

Stage 3	Carbon Filter

## About the Filter

### Filter Replacement Cycle

Filter	When to Replace
True HEPA 3-Stage Filter	4-6 months

\* The expected filter replacement cycle is estimated by a close review of the filters to display its proper performance. This is determined based on the product usage time (12 hours) per day and indoor pollution index of  $150\mu\text{g}/\text{m}^3$ . Thus the cycle may shorten as the usage time or indoor pollution index goes up. (Based on GB/T 18801-2015 standard)

### Maintenance

- Ensure the product is unplugged before maintenance.
- Do not immerse the air purifier into water or any liquid.
- Do not use abrasive, corrosive or flammable cleansers (such as bleach or alcohol) to clean any part of the unit.
- Do not wash the filter.
- Do not use a vacuum cleaner to clean the filter.

### Cleaning and Storage

- Ensure the product is powered-off and unplugged.
- Use a soft cloth with neutral cleanser to clean away any dust or debris from the surface of the product and air intake/vent.
- If you do not use it for a long time, please turn on the product for a few minutes from time to time to ensure a good performance.
- Please do not drop any water into the product when cleaning the air outlet.

\* Please comply with the 'Caution' as they are provided to ensure safe and proper use of the product and prevent accidents and dangerous situations.

## Safety Instructions

### Introduction

Thank you for choosing a device from Afloia.

### Intended use

- The device is used exclusively for cleaning the ambient air indoors.
  - Please read these operating instructions before using the machine and please follow the safety instructions.
- The operating instructions must be kept available at all times.

### Safety instructions

- Keep packing material, such as plastic wrapping, away from children!  
(Risk of suffocation)
- Please follow the safety instructions to prevent fire or electric shock. Only use the device indoors.
- Only use a socket that supplies the correct voltage (see rating plate).
- Do not modify or repair the device.
- Do not use the device if the power cable or mains plug is damaged or if the connection at the socket is not stable.
- Make sure that the power cable does not get crushed while you are using the device and that it cannot be damaged in any other way. Place the cable so that no one will trip over it.
- Do not pull the power cable tight.
- Disconnect the plug from the socket for cleaning purposes and whenever the device is not in use for a significant period of time.
- Do not touch the plug or the device if you have wet hands.
- Do not spray any insect repellent.
- Do not use in rooms where the device may come into contact with fuel vapour, oil vapour or metal dust.
- Do not use any volatile liquids, petroleum, kerosene, paint thinner or polishing paste to clean the device. Such liquids may damage the surface of the device.
- Do not expose the device to rain, water, moisture or high humidity, and do not set it up in a bathroom or kitchen next to a sink.
- Make sure that no foreign objects get into the outlet grilles.
- Do not use near a naked flame or sparks.
- The device is not suitable for removing harmful gases (carbon monoxide, e.g. from heating appliances).
- Unless they are supervised, the device must not be used by those (including children) with reduced, physical, sensory and mental abilities or who do not have the required experience and knowledge.

## Caution

### Safety Instructions

---

#### Safety instructions

- Do not block the air intake or outlet.
  - Do not expose the air purifier to direct sunlight, a naked flame or heat.
  - Only use the air purifier in living quarters and within the specified technical parameters. Improper usage may pose a threat to life and health.
  - Do not use the device near a smoke detector. Air blowing towards a smoke detector could delay the alarm or not trigger at all.
- 

#### Caution

- Risk of injury due to electric shock.  
Always disconnect the mains plug prior to :
- Maintenance and cleaning
  - Moving the device
  - Changing the filter
- 

#### Caution

- Do not use any spray cans with flammable contents near to the air purifier!
- 

#### Caution

- Do not use any flammable cleaning agents

- ▼ Not following this user manual may result in your device not working. Please read the following measures accordingly if you are having problems with your device. If you are still having problems, please contact our Customer Service Centers.

Problem	Checklist	Recommendation
The product won't work even if I press the Power button.	Are you in a black out?	Check the power supply.
	Is the power cord plugged into the power outlet?	Put the power plug in a power outlet.
No air is blowing out.	Is there material blocking the intake or air vent?	Remove material from vent/intake. Check if plastic packaging has been removed from filter.
	Is the air purifier placed where the intake or blocked preventing air from moving freely?	Remove objects blocking the air purifier or place it elsewhere.
	Air purifier is on but fan does not work.	Unplug from the wall and contact Afloia customer service: <a href="mailto:service@afloia.com">service@afloia.com</a>
Loud Noises	Is there anything stuck in the fan or air intake/vent?	Please remove any objects you see from the fan intake/vent.
	Is the air purifier tilted on its side?	Make sure the base is level on a flat surface.
	Is the fan really loud?	Set your air purifier to a lower fan speed to reduce the noise.

## Troubleshooting

Problem	Checklist	Recommendation
Coming out nasty smell	Is the air purifier in a place with a lot of smoke and odor?	The performance of the air purifier may decrease over time if there is excessive smoke and odor in the area. To remedy this, please air out the room before using the air purifier.
	Should I clean or replace my filter?	Check the filter replacement indicator and clean or replace the filter if necessary.
	Do you smell plastic?	It is common that in the first uses the smell of plastic will be emitted. It will eventually go away. If not, please contact our customer service centers.
	Is there a burning smell?	Turn off your air purifier, unplug it from the wall and contact our customer service center.
The air purifier is not purifying the area well.	The air purifier may be placed in an area with no ventilation, or there is an obstacle near it.	Ventilate the room and then use the product. Use the product in an area not exceeding its coverage limit. (Avoid placing the device where it is well ventilated like a door or window.)
	Is there any dust in the pre-filter?	Wipe the Pre-Filter
	Are there any objects blocking the air intake/vent?	Please remove any objects from the intake/vent.
	Have you removed the filter from it's packaging?	The plastic bag of the filter may not have been removed, so please open the cover and check if the plastic bag is removed.
	Is the filter dusty? Maybe it is time to replace the filter.	Change the filter if it looks like it needs to be replaced.
	Is intake/vent dusty?	Clean the air vent/intake.
The filter replacement alert is still blinking after I changed the filter.	Have you reset the filter change button?	Press and hold the filter button for 7 seconds to reset the filter replacement alert.

Note : If these suggestions do not work accordingly, please contact Aflora customer service and await instructions. Do not disassemble, repair or fix anything by yourself.
