Dear customers,  
Thank you for purchasing Afloia Air Purifier.

Please keep this User Manual for your reference.  
This manual will guide you if you have any questions or troubleshooting problems.

---

## Top Features of Afloia Air Purifier

---

- **Air Purification**  
This product filters out fine dust, allergens, and more that is airborne using a True HEPA 3-Stage Filter mounted in the base of the product.
- **Timer Setting**  
You can set the timer from 2 to 8 hours depending on preference.
- **Automatic Operation Function Through Dust Sensor**  
The product detects the pollution status of the air indoors in real time through the dust sensor. When automatic operation setting is selected, the product automatically adjust the fan speed according to the surrounding pollution degree to make the indoor environment pleasant.
- **3 Color LED Air Quality Display**  
The product automatically detects the cleanliness of the indoor air through the dust sensor and displays the cleanliness. The air quality display screen represents the pollution degree of solid contaminants in the air with 3 colors.
- **Filter Replacement Indicator**  
Built-in replacement indicator reminds user when the filter is needed to be replaced.
- **Portable Desi**  
Easy-to-carry handle and portable design. Perfect size for a large space like a living room or family room.
- **True HEPA 3-Stage Filter**  
Collect pet dander, ultrafine dust, odour and much more with this 3 in 1 True HEPA Filter.

Please read the instructions carefully before using the product and keep them properly.

## Description of Parts

### Unboxing

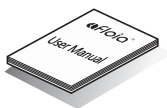

To unbox the air purifier, open the box, take out the foam lining, and take out the internal accessories and user manual.

Pull the air purifier out of the box and pull down the plastic covering surrounding it. Keep the product box in a safe location for future use. After clearing the inner packaging of the air purifier, open the base of the air purifier, take out the True HEPA filter and remove plastic packaging.

## How to Replace Filter

\* Note :

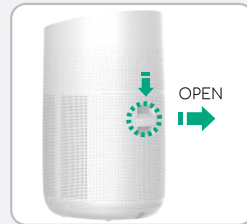

- Please remove the packaging from the filter before using it.
- Ensure the product is unplugged before removing or installing the filter.
- Please wipe the dust on the filter regularly, do not wash or use it repeatedly.
- Please do not use other filters that are not designed for this air purifier.

- 1 When the icon on the bottom of the control panel continuously blinks red, it means the filter needs to be changed.

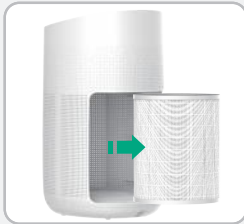

It flashes red if it is used for the first time. Operation method: turn on--press the power button until the red light stops flashing--is ok.

- 2 To remove the Back Cover of the air purifier, push the lever down and pull.

- 3 Take out the old filter from the air purifier.

- 4 Remove the packaging around the new filter.

- 5 Place the new filter into the base of the air purifier.

- 6 Place the Back Cover while pressing the Sliding Block.

\* Note

Failure to properly place the filter and back cover on the air purifier, may result in air purifier not working properly.

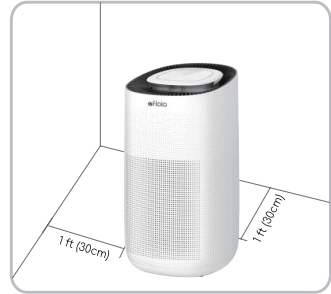

## Resetting the Filter Replacement Alert

When the air purifier detects that the filter reaches the saturation value, the LED light keeps flashing in red.

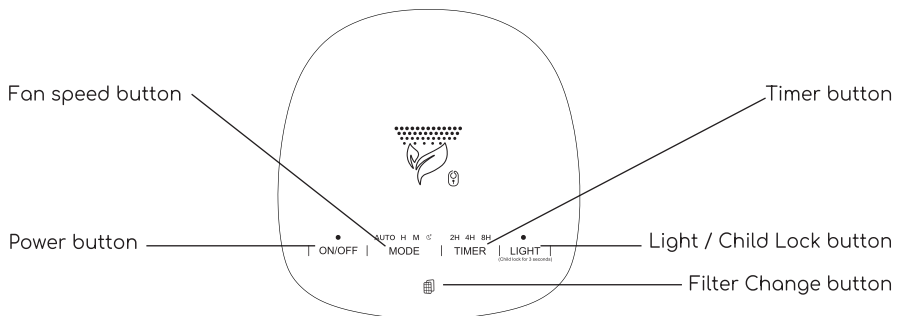

After replacing with a new filter, the **FILTER REPLACEMENT ALERT** needs to be reset. Please restart the purifier and keep pressing the power button until the light stops blinking.

## Maximum Purification Efficiency

- Keep 1 ft / 30cm away from where oxygen is being administered.
- To effectively clean air, keep windows and doors closed while the air purifier is on.
- Keep the inside of the air purifier dry. To prevent moisture buildup, avoid placing in rooms with major temperature changes or underneath air conditioners.

## Names and Functions of Control / Display Panel

### \* Note

When the product connects to the power outlet, the buzzer will ring for once. The product enters the pre-processing mode (the indicator light will change in blue, cyan, green, yellow, red, purple, and after 30 seconds of pre-processing, the color corresponding to the current air quality will be displayed).

## Button Description

<p style="text-align: center;">● ON/OFF</p>	<p><b>Power Button</b></p> <ol style="list-style-type: none"> <li>When turning on the air purifier, the air purifier will beep and the default fan speed will be medium.</li> <li>The air purifier will assess the air quality for 30 seconds and will be indicated by 7 revolving colors (Blue, Cyan, Green, Yellow, Orange, Red, Purple). After the 30 seconds, the air purifier will indicate the current air quality by the color it shows. (Blue = Excellent, Yellow = Moderate, Red = Poor)</li> <li>Press again to turn off the machine, all the light will be off, then the machine is in standby mode.</li> </ol>
<p style="text-align: center;">AUTO H M ☺ MODE</p>	<p><b>Fan Speed Button</b></p> <p>There are 4 options for fan speed. H or High, is the fastest fan speed. M or Moderate, is the second fastest fan speed. or Sleep, is the lowest fan speed and most quiet.</p> <p>AUTO automatically adjusts the fan speed according to air quality.</p> <p><b>1. Auto Mode</b></p> <p>The fan speed will automatically adjust itself according to the current air quality. And the wind speed will auto-change according to the air quality among high mode, middle mode and low speed mode.</p> <p><b>2. H Mode (High)</b></p> <p>When the machine works in a High Mode, the corresponding indicator will be on.</p> <p><b>3. M Mode (Moderate)</b></p> <p>When the machine works in a M Mode, the corresponding indicator will be on.</p> <p><b>4. ☺ Mode (Sleep)</b></p> <p>The lowest and quietest fan speed. After this mode has been on for 5 seconds, the lighting will be dimmed.</p> <p>The sleep indicators will be on again after touching any button.</p>
<p style="text-align: center;">2H 4H 8H TIMER</p>	<p><b>Timer Button</b></p> <ol style="list-style-type: none"> <li>To use the timer, press the timer button until you reach desired time. You can select between 2 hours, 4 hours, or 8 hours.</li> <li>When the timer is up, the air purifier will turn off the fan and all lights will be on standby mode.</li> </ol>
<p style="text-align: center;">● LIGHT <small>(Child lock for 3 seconds)</small></p>	<p><b>Light / Child lock Button</b></p> <p>There are three different light brightnesses you can control: standard, dimmed, and off. Push the light button repeatedly until you reach your desired brightness preference.</p> <p>(Note : You cannot change the light brightness while the air purifier is assessing the air quality the first 30 seconds the machine turns on.)</p> <p>To child safe lock, press and hold the light button for 3 seconds until the lock icon shows. To unlock, press and hold for 3 seconds until the lock icon disappears.</p> <p>(Note : Any functions cannot operated in the mode of Child lock function unless you long press this button to unlock it.)</p>

### Filter Change Button

Filter Change Button: After your air purifier has been running for 2200 hours or if it detects the filter is saturated before the 2200 hours, the filter indicator will flash red. After replacing the filter, turn on, press and hold the Filter Change Button for 7 seconds or until the light stops flashing. This will reset the system to adapt for the new filter.

## Connect the Power

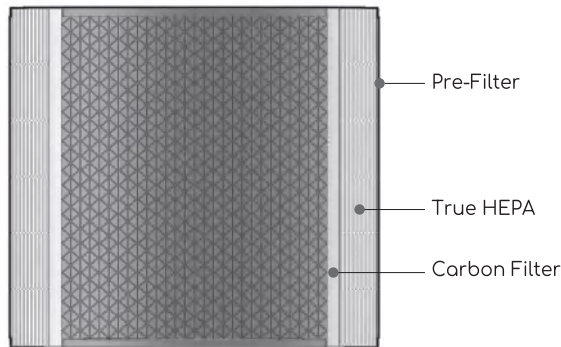

Please confirm that the input voltage is AC100-240V 50/60Hz, and ensure that the power plug and your hands are dry before you insert the power cord plug into the outlet.

Note: Contact Customer Service when the power cord or plug is damaged or the power outlet is loose.

We strongly recommend that the damaged parts be repaired or replaced.

To replace the damaged power cord or plug, please visit Afloia website and contact Customer Service.

## About the Filter

※ The picture may differ from the actual product.

True HEPA 3-Stage Filter	
Stage 1	Pre Filter
Stage 2	True HEPA
Stage 3	Carbon Filter

## Filter Replacement Cycle

Filter	When to Replace
True HEPA 3-Stage Filter	3-6 months

\* The expected filter replacement cycle is estimated by a close review of the filters to display its proper performance. This is determined based on the product usage time (12 hours) per day and indoor pollution index of 150 $\mu\text{g}/\text{m}^3$ . Thus the cycle may shorten as the usage time or indoor pollution index goes up. (Based on GB/T 18801-2015 standard)

## Maintenance

- Ensure the product is unplugged before maintenance.
- Do not immerse the air purifier into water or any liquid.
- Do not use abrasive, corrosive or flammable cleansers (such as bleach or alcohol) to clean any part of the unit.
- Do not wash the filter.
- Do not use a vacuum cleaner to clean the filter.

## Cleaning and Storage

- Ensure the product is powered-off and unplugged.
- Use a soft cloth with neutral cleanser to clean away any dust or debris from the surface of the product and air intake/vent.
- If you do not use it for a long time, please turn on the product for a few minutes from time to time to ensure a good performance.
- Please do not drop any water into the product when cleaning the air outlet.

## Caution

We recommend replacing the filter every 3-6 months. However, you may need to change your filters sooner or later depending on use frequency and air quality.  
For buying more filters, please visit Afoia website and contact Afoia customer service.

## Safety Instructions

- Ensure the product is unplugged before maintenance/Maintenance cleaning/Moving the device/ Changing the filter. Risk of injury due to electric shock.
- Do not immerse the air purifier into water or any liquid.
- Do not use abrasive, corrosive or flammable cleansers (such as bleach or alcohol) clean any part of the unit.
- Do not block the air intake or outlet.
- Do not use any spray cans with flammable contents near to the air purifier!
- Do not use a vacuum cleaner to clean the filter.
- Use a soft cloth with neutral cleanser to clean away any dust or debris from the surface of the air purifier and air intake/vent.
- If you do not use it for a long time, please turn on the air purifier for a few minutes from time to time to ensure a good performance.
- Do not use the device near a smoke detector. Air blowing towards a smoke detector could delay the alarm or not trigger at all.
- Only use the air purifier in living quarters and within the specified technical parameters.
- Do not expose the air purifier to direct sunlight, a naked flame or heat.

## Troubleshooting

- ▼ Not following this user manual may result in your device not working. Please read the following measures accordingly if you are having problems with your device. If you are still having problems, please contact our Customer Service Centers.

Problem	Checklist	Recommendation
The product won't work even if I press the Power button.	Are you in a black out?	Check the power supply.
	Is the power cord plugged into the power outlet?	Put the power plug in a power outlet.
No air is blowing out.	Is there material blocking the intake or air vent?	Remove material from vent/intake. Check if plastic packaging has been removed from filter.
	Is the air purifier placed where the intake or blocked preventing air from moving freely?	Remove objects blocking the air purifier or place it elsewhere.
	Air purifier is on but fan does not work.	Unplug from the wall and contact Afloia customer service: <a href="mailto:service@afloia.com">service@afloia.com</a>
Loud Noises	Is there anything stuck in the fan or air intake/vent?	Please remove any objects you see from the fan intake/vent.
	Is the air purifier tilted on its side?	Make sure the base is level on a flat surface.
	Is the fan really loud?	A few seconds of noise when turning on, and if left in Auto mode it will occasionally use a higher speed. Normal operation is very quiet; less than a normal pedestal fan.
Coming out nasty smell	Is the air purifier in a place with a lot of smoke and odor?	The performance of the air purifier may decrease over time if there is excessive smoke and odor in the area. To remedy this, please air out the room before using the air purifier.

Problem	Checklist	Recommendation
Coming out nasty smell	Should I clean or replace my filter?	Check the filter replacement indicator and clean or replace the filter if necessary.
	Do you smell plastic?	It is common that in the first uses the smell of plastic will be emitted. It will eventually go away. If not, please contact our customer service centers.
	Is there a burning smell?	Turn off your air purifier, unplug it from the wall and contact our customer service center.
The air purifier is not purifying the area well.	The air purifier may be placed in an area with no ventilation, or there is an obstacle near it.	Ventilate the room and then use the product. Use the product in an area not exceeding its coverage limit. (Avoid placing the device where it is well ventilated like a door or window.)
	Is there any dust in the pre-filter?	Wipe the Pre-Filter
	Are there any objects blocking the air intake/vent?	Please remove any objects from the intake/vent.
	Have you removed the filter from its packaging?	The plastic bag of the filter may not have been removed, so please open the cover and check if the plastic bag is removed.
	Is the filter dusty? Maybe it is time to replace the filter.	Change the filter if it looks like it needs to be replaced.
	Is intake/vent dusty?	Clean the air vent/intake.
The filter replacement alert is still blinking after I changed the filter.	Have you reset the filter change button?	Press and hold the filter button for 7 seconds to reset the filter replacement alert.

Note : If these suggestions do not work accordingly, please contact Afloia customer service and await instructions. Do not disassemble, repair or fix anything by yourself.

## Product Specifications

Category	Air Purifier
Model	Max
Power Supply	AC100-240V 50/60Hz
Rated Power Input	50W
CADR(Clean Air Delivery Rate)*	550 m³/h
Noise	≤ 56dB
Dust Collecting Method	Mechanical dust collecting method
Product Size	D10.6 x W11.9 x H19.6 inch / D270 x W303 x H497 mm
Product Weight	10.1 lbs (4.6kg)
Place for Use	For indoors

The information (exterior, design, and specifications) provided in this User Manual is subject to change without prior notice to improve the quality of the device.

## Inquiry about Malfunction

Product parts may wear out due to heat, moisture, dust and other causes over time, which in turn may cause malfunction of the product.

In the case that

- ① Something other than the symptoms coming under "Troubleshooting" in page 13-14 occurs;
- ② You can feel electricity when you touch the product with your hands;
- ③ The power is supplied, but the motor does not work;
- ④ Other malfunctions occur.

Please stop using the product.  
Please unplug the product and contact [service@afloia.com](mailto:service@afloia.com)
