

STRONGBACK S-Models

Difference Overview S-Models vs. Standard

We are switching all of our Standard STRONGBACK models with 16" seat width to our NEW S-Models. The Excursion12S will only be available with attendant brakes. The STRONGBACK22S will be available with or without the attendant brakes.

We will implement this change immediately.

Difference Overview STRONGBACK Excursion 12S vs. Excursion 12

	12" S Model (1016AB)	12" with 16" seat (1001AB)	Remarks
Rear wheels	Same	Same	-
Axle position	1 Position	1 Position	Pro: seat is lower to the ground
Seat	Width 16" Length/Depth 16"	Width 16" Length/Depth 18"	Pro: the shorter depth of the seat is more comfortable for a shorter thigh length. The customer can sit to the very back without cutting of the blood circulation in the hollow of the knee.
Backrest Height	Height 18"	18"	Neutral
Height ground to seat	18"	20"	Pro: foot pedaling improved/easier
STRONGBACK Recommendation	Most suitable	Suitable	

Difference Overview STRONGBACK22S vs. STRONGBACK24

	22" S Model (1017/1017AB)	24" with 16" seat (1006/1006AB)	Remarks
Rear Wheels	22"	24"	Pro: seat is lower to the ground
Axle position	1 Position	3 positions possible	Neutral: since changing the axle position is not a huge selling point
Seat	Width 16" Length/Depth 16"	Width 16" Length/Depth 18"	Pro: the shorter depth of the seat is more comfortable for a shorter thigh length. The customer can sit to the very back without cutting of the blood circulation in the hollow of the knee.
Backrest Height	Height 18"	18"	Neutral
Height ground to seat	18"	20"	Pro: foot pedaling improved/easier
STRONGBACK Recommendation	Most suitable	Suitable
