HD Freedom 230 Digital Hearing Aid

The HD Freedom 230 is a mid-range in-the-ear hearing aid that has the same physical design as our previous popular HD91 model, but is loaded with more technical capability.

Designed specifically for those with a mild to moderate hearing loss. It comes with a no nonsense push-button to change between 3 volume levels.

- Setting 1 is set 2dB softer than the software's recommendation for a mild to moderate loss to give a softer option on startup.
- Setting 2 is as per a mild to moderate recommendation
- Setting 3 is 3dB louder than setting 2.

Look and feel

The Freedom 230 is developed to sit snugly within the average adult sized ear canal. Ready to be fitted at home straight-away without the need for an ear impression. If however, you experience discomfort or unwanted feedback, it comes supplied with a number of different silicone fitting tips (or domes) for an improved fit.

Dimensions are: 12mm x 12mm x 6mm

Don't just take our word for it...

"I've been using Hearing Direct Freedom hearing aids for a few weeks now and I'm blown away by how much they've improved my life. I can finally hear my grandkids' voices clearly and enjoy conversations with my friends without having to ask them to repeat themselves. The best part is that they're so easy to use and comfortable to wear that I forget I'm even wearing them. I feel like I have my freedom back!" - Mary, age 70
