Safety Clothing

Level Two SMS Disposable Isolation Gowns

- 100% made in the USA
- Disposable and hygienic
- AAMI Level Two
- Available with either elastic cuffs or thumb loops
- Meets all ASTM F3352/F3352M requirements

Isolation gowns help keep sensitive environments free of outside contaminants and are part of an overall infection control strategy. They help protect the wearer from potentially infectious liquid and solid material. They also help prevent the transfer of microorganisms to vulnerable patients. This personal protective equipment (PPE) is suitable for hospitals, health clinics, and cleanrooms.

About Health Supply US

Mission Statement

Health Supply US is transforming the pipeline for America's health care facilities, first responder networks, and Federal, State and Local Governments. We identify, source, and deliver essential safety and medical supplies to frontline workers and those who need them most. Our team—from support to procurement to delivery—is on a mission to supply the best available products to those who risk it all to keep America healthy and safe.

HSUS is different from the majority of PPE providers currently overrunning the marketplace. We are dedicated to reshoring PPE manufacturing as a matter of national security so that the overreliance on foreign products that led to chronic shortages of critically needed products never happens again. HSUS does more than deliver products to protect American workers; we support the creation of manufacturing jobs to employ them.

Why we care

Our company has first-hand experience of the challenges and incongruencies in the medical field through our communal background in law enforcement, healthcare, and first responders. When the opportunity arose to effect change and make a difference in the supply chain, we thought about how we could streamline our expansive network to deliver quality products like personal protective equipment (PPE) in a more timely, reliable manner.

Our unique perspective and our commitment to serving others make us highly qualified to deliver these critical supplies to where they are needed most. We strive every day to earn the trust and exceed expectations with our customers. Above all else, we care about the health, safety, and well-being of every healthcare professional and first responder working tirelessly to keep our country safe and healthy.

Stay Healthy. Stay Safe.
