

Durable Devices, Refined Results

XLR8
COMMERCIAL-GRADE
PERCUSSION
MASSAGER

The NIMBL XLR8 is an elite commercial-grade massage device designed for fitness experts, trainers, gyms, physical therapists and anyone that demands the best in their equipment performance, reliability and durability.

"We are constantly encouraging our players to take soft-tissue recovery and preparation as seriously as they take their training.

The NIMBL has become a great tool in our arsenal. I like the variety of attachments and the ability to change the frequency through such a broad range.

You just can't replace this device or the stimulus it gives athletes in the area of tissue regeneration and performance priming."
