

# CONO

Have fun getting serious about light and sound. Cono is a functional and striking luminaire combining robust noise-absorbing materials, distinctive design details and high-performance output options. The unique acoustic pendant is ideal for commercial interior spaces that need to make an impact. Think reception areas, service counters, lobbies, retail environments, and hospitality venues.

Available in 2 sizes and an extensive range of over 50 premium wool finishes for a truly customizable look. Perfectly marrying sound control and illumination into one multi-purpose product, Cono is offered in multiple output options, including a glass-diffused ambient light source. The conical shape also optimises acoustic performance, lowering the volume in open spaces. Use as a singular design statement or install enmass for added personality.
