

# HEMII

A large dome pendant designed to enhance an environment's acoustics while seamlessly blending into existing design features. Hemii combines powerful noise-absorbing materials with a high-performance round LED panel and minimalistic design, to create the ideal acoustic light for open-office environments.

Available in 2 sizes and an extensive range of over 50 textural finishes across the full-color spectrum. The pendant is crafted from wool and PET material, which is a dense polyester fiber that is manufactured from recycled plastics and is fully recyclable at the end of life.
