95:

Luca Fornasarig ha ampliato la famiglia Link progettando un sedile e schienale con una innovativa resina poliolefinica rinforzata ad alte prestazioni. Una scocca seduta allo stato dell'arte porta la collezione Link ad un livello completamente nuovo. Con una impilabilità senza precedenti, leggerezza e versatilità stabilisce nuovi standard nel settore. Un ampio sedile e schienale curvati in 3D rendono la poltrona molto confortevole, mentre il robusto telaio da 11 mm assicura la resistenza senza compromettere il design. 100% riciclabile, metodi di produzione all'avanguardia ed un design ottimizzato si aggiungono ad un imbattibile rapporto qualità / prezzo. Una selezione di sei colori per la seduta ed il telaio con le loro differenti combinazioni garantiscono una ampia scelta del design più adatto. Link 60X è la scelta ideale per i luoghi in cui lo stile e la praticità sono fattori altrettanto importanti.

Luca Fornasarig moved Link 60X forward with a seat and back made of high-performance reinforced polyolefin resin. The state-of-the-art seat shell take Link to a whole new level. More stackable than any other chair it sets new standards when it comes to lightweight and versatility. A wide 3D ergonomically moulded seat and back make the chair very comfortable while the 11 mm solid rod frame ensure strength without compromise to design. 100% recyclable, state-of-the art manufacturing methods and a two-component design add up to an attractive price and good value. A choice of six colours for the body and frame ensure huge design scalability. Link 60X is the ideal choice for settings where style and practicality are equally important factors.

100:

When many are grouped together, their sizes and soft shapes lend them a distinctive look but don't detract from their surroundings. This line is primarily aimed at areas where seating has to be stylish, yet practical to pick up and move around.

Link 60X Wood

→ Luca Fornasarig

La linea armoniosa e curva della seduta e la raffinatezza del profilo sono la sintesi perfetta del progetto Link. Ispirata alle forme precise della tecnologia e alla razionalità dell'architettura moderna, Link è progettata per rispondere alle esigenze funzionali di ambienti professionali dinamici e contemporanei, ed è ideale per sale conferenza, auditorium, centri di formazione e spazi home office. Link combina un profilo leggero e una seduta generosa. È facile da impilare e trasportare.

The graceful curved back and clean profile are the ultimate synthesis of the Link chair. Drawing inspiration from both technological precision and architectural rationality, the Link chair is engineered to meet the demands of the contemporary dynamic workplace as well as those of conference halls, auditoriums, training centers and home offices. With a winning combination of high seating comfort and discreet elegance Link chair is easy to stack and move.

Link 60X Fabric

→ Luca Fornasarig

Mantenendo lo stesso unico profilo che contraddistingue tutta la collezione, Link 60X Fabric aggiunge la possibilità del sedile e schienale imbottiti. L'ergonomia è ideale per un utilizzo in sale meeting e conferenza.

Featuring the same clean and authentic Link profile, Link 60X Fabric adds a fully upholstered seat and back with the greatest possible freedom of choice for fabrics. Even during longer events, the ergonomic shape provides seating without tiring.
