
Air Whiteboard

LINTEX

Air Whiteboard One board – numerous solutions

Featuring an elegant, minimalist design, Lintex Air is a family of magnetic and writable whiteboards that suits any environment, giving you a clear overview of your ideas.

The frameless, bevelled edges of the Air series accentuate the fine design, and in combination with the hidden mountings, give the impression of a floating board. The design also enables several boards to be mounted side by side in order to fill an entire wall.

The highly durable, scratch- and stain-resistant ceramic steel surface of the Air whiteboards ensures a super-smooth, fully erasable writing experience. We offer a wide range of sizes and surfaces and the whiteboard can even be combined with textiles in a wide range of colours.

With its beautiful design, supreme writing properties and unrivalled durability, the Air series is the perfect visualisation solution for offices and educational institutions.

board and hidden
mountings provide a
minimalist look.

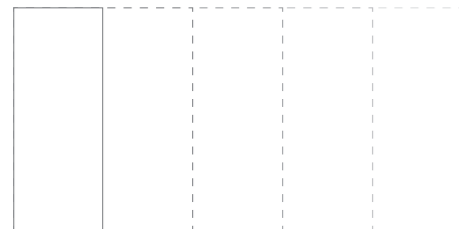

Air Spaces

Lintex Air Whiteboards allow you to create large spaces for endless creativity and collaboration. The simple tongue and groove join ensures fully level mounting with a mere 1mm micro seam between the surfaces. Add a chalkboard or a textile noticeboard for a more personalised space with even more possibilities. See more on page 10.

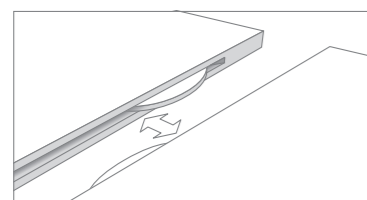

The boards can be mounted vertically or horizontally. Please contact our customer service for further information.

Eraser and magnets.

Pen Tray, Birch

Air Lines

Air Lines features thin grey lines to guides your writing on the board. The fine lines are fused in the ceramic steel for optimal quality and accuracy. The pattern resembles a classic lined paper sheet and offers a natural writing guide.

Materials

Whiteboard surfaces

Delivering long-lasting quality with environmental responsibility, Lintex Air Whiteboard provides high performance and a great writing experience for years to come.

A smooth surface resistant to chemicals, scratching and wear ensures durability, erasability and low maintenance.

Choose Lintex Air Whiteboard for a sustainable, ultra-smooth and lifetime-warranted solution that stands up to everything from scratches and stains to bacteria and fire.

Surface options

Lintex Air Whiteboard offers three different surface options – gloss, semi-matt and matt – to meet the needs of your environment and product use. Choose a supersmooth gloss finish for superior dry-erase performance or opt for matt surfaces to showcase projected images with high clarity.

The surfaces are manufactured using an ISO 9001 compliant, continuous coil-coating process consisting of a light gauge steel core covered on both sides with thin enamel coatings. The ceramic finish is fused to the steel at a temperature of between 700 and 900°C.

Chalkboard surfaces

Lintex Air Chalkboard surfaces combine excellent erasability with wear resistance and durability. The smooth matt finish yields less chalk dust for a cleaner, healthier environment. Our chalkboard surfaces are easy to clean with wet or dry cloths.

Care and maintenance

Before using the board for the first time

1. Remove the protective film.
2. Clean the board carefully using a wet cloth.
3. Wipe the board completely dry.

Daily cleaning

Wipe the board using a Lintex whiteboard eraser.

Deep cleaning

Clean the board carefully using water and a microfibre cloth. Never use a soap solution! If the board is unusually dirty and stained, use a designated cleaning solution.

After cleaning, make sure the board is completely dry before use. Moisture on the board will have a negative affect on writing and erasing performance.

Scratch-, stain- and bacteria-resistant
At least ten times more scratch-resistant than other whiteboard surfaces.

e3 certified 99% recyclable
The Air Whiteboard is 99% recyclable. Cradle to Cradle Certified™ Silver.

Ultra-smooth writing
Can be written on with any dry-erase, semi-permanent, water-soluble, permanent marker pen without damaging the surface.

Erasability
Dry-erase marker ink can be wiped off easily using a dry cloth or a standard eraser. Semi-permanent and permanent marker Pen inks can be removed with a solvent-based cleaner.

Magnetic
Easy to store eraser, magnets and pens directly on the board.

Environmentally friendly
In all coatings, the total amount of heavy metals – cadmium, mercury, hexavalent chromium and lead – is less than 0.1%

Optimum eye comfort and visibility
Sharp, clear and distinct marker lines provide maximum colour contrast.

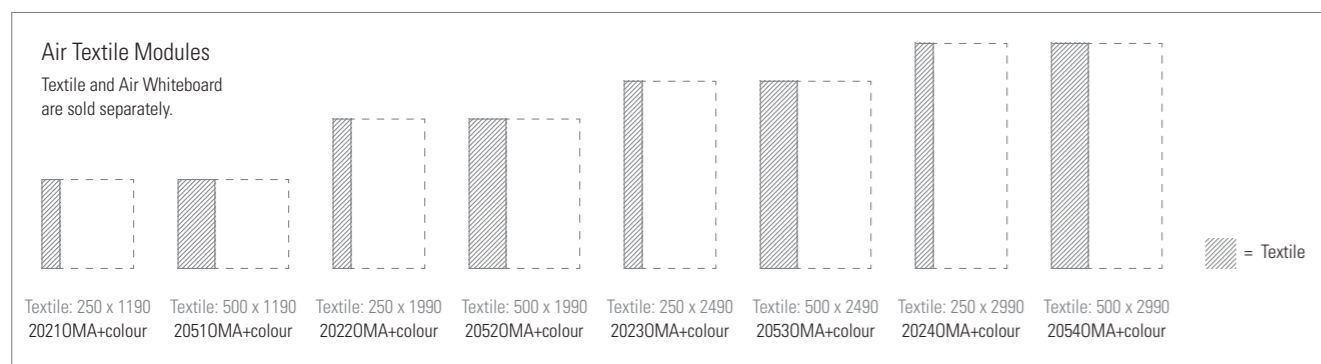

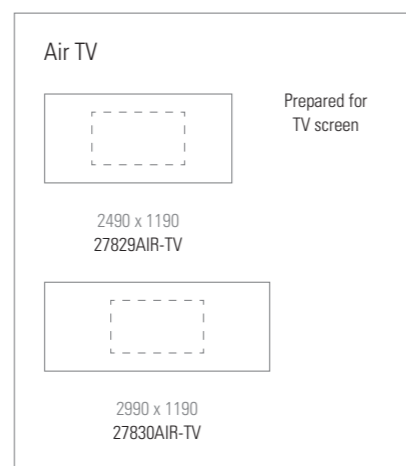

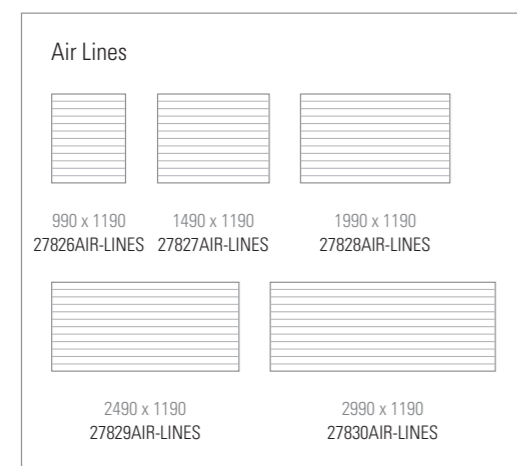

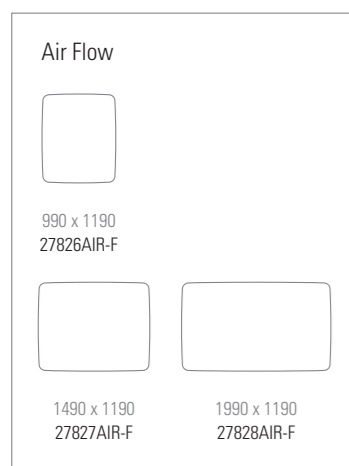

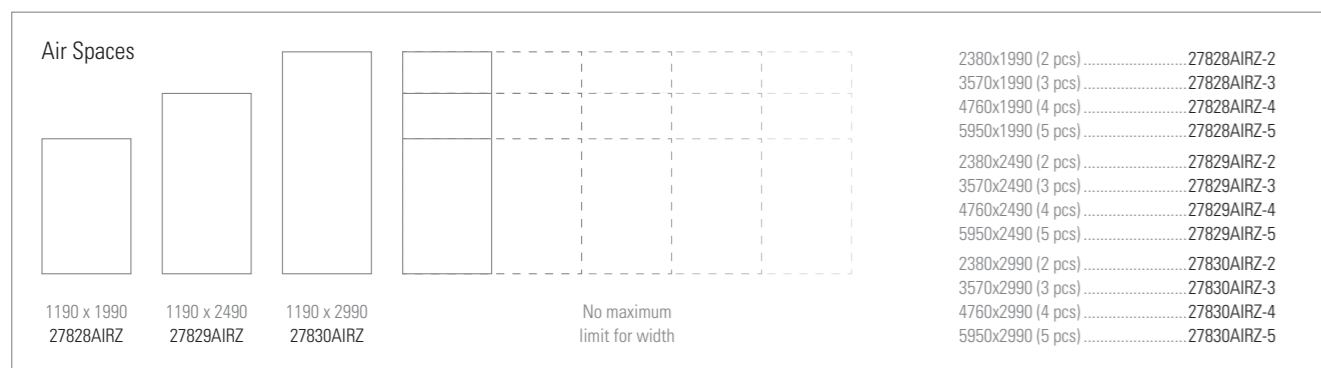

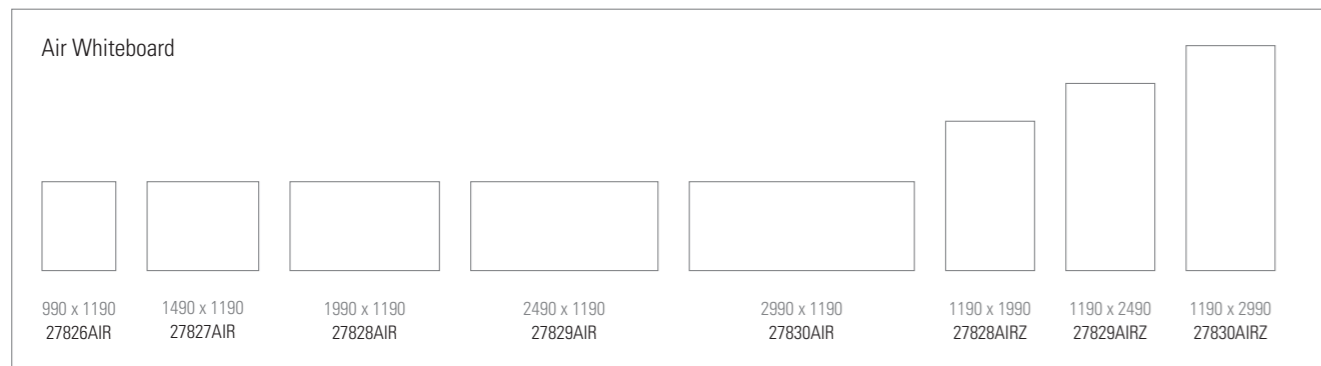

Cleanability
All residues that remain after normal erasing can be removed by following the care and cleaning instructions.

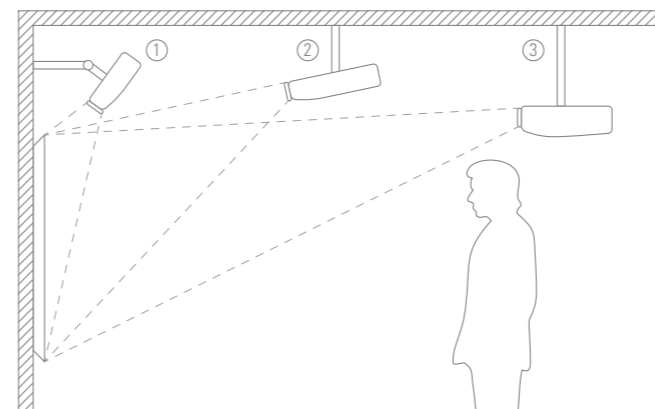

30-year warranty on writing surface
e3 CeramicSteel for a sustainable, ultrasmooth and lifetime-warranted solution.

Sizes in mm

Projection surfaces

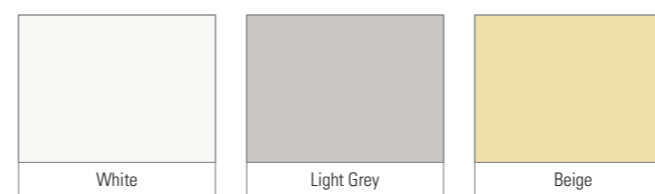

Use of projection is only advised on whiteboards with a white surface. For writing, gloss surface outperforms matt and semi-matt surfaces. With an ultra short throw projector, the gloss surface can also be used as a projection screen. With a short throw and normal throw projector, a matt or semi-matt surface is preferable in order to avoid hot spots on the projection surface. Less gloss also means less suitable for writing and we do not recommend using a matt surface as a writing board.

- ① **Ultra short throw**
Gloss, Semi-matt or matt.
- ② **Short throw**
Semi-matt or matt.
- ③ **Normal throw**
Matt.
