

## Waterclub Water Filtration Dispenser Installation Process

### Installation Process

- Check the water connection
- Connect T-Junction and 1/4" water pipe

Before  
Installation

After  
Installation

- Connect the pipe to the machine (different machine from the photo, but same type of the job)  
(might need to do a drill, size as per the photo)

Exact size with the  
pipe, 1/4"

d. Flushing

We will open the water tap of the machine and let the fresh water flowing as it is new machine and new filters, time need: between 15-30mins max

e. Final check

- Water taste
- Hot water
- Cold water
- Water pipe connections
- T-junction connections

f. Cleaning of the area for any kind of waste that caused by installation
