

Product INFORMATION

Gelair™ Tub is the simplest way to stop mold and bacteria in low air volume and air flow areas such as bathrooms, toilets and wardrobes. The healthy living technology in the all purpose Gelair™ Tub delivers controlled and sustained Australian Tea Tree Oil vapour throughout the area killing mold, bacteria and viruses.

Description

Gelair™ Tub contains a specially formulated gel matrix impregnated with Tea Tree Oil in a dispensing Tub.

The gel matrix in Gelair™ Tub provides the controlled and sustained release of high quality Australian Tea Tree Oil vapour and will last up to 12 weeks depending on air flow. Once released, the vapour permeates through the area or room, sterilising and sanitising both the air and surfaces.

The sterilising and sanitising properties of the Gelair™ Tub continues for the life of the gel matrix due to its ability to control the release of specific concentrations of Tea Tree Oil vapour over a long period of time.

About Tea Tree Oil

The active ingredient of the Gelair™ Tub is Australian Tea Tree Oil. Tea Tree Oil is an essential oil which is known around the world for its incredible sterilising properties (removing or killing many forms of microbial life present including transmissible agents such as fungi, bacteria, viruses, spore forms etc). The sterilising properties of Tea Tree Oil are present both in the oil and in the vapour (tiny particles of the oil which have become airborne).

Not all Tea Tree Oils are of a similar standard. All Gelair™ products contain only Australian Tea Tree Oil sourced from a single ISO certified plantation. This ensures a superior product every time with minimal chance of irritation caused by poor quality oil.

Tea Tree Oil has a characteristic odour which most people describe as “fresh” and “clean”.

Benefits

1. Kills mold.
2. Kills bacteria (including *Legionella*).
3. Kills viruses.
4. Eliminates odour caused by mold and bacteria.
6. 100% natural.
7. No bacteria resistance issues.
8. Simple to install and no maintenance.
9. One product, multiple actions.

Product Details

Gelair™ Tub is available in two(2) fragrances and two (2) sizes.

Lemon- logo to be created

Size	Description
250 millilitre Tub	<ul style="list-style-type: none"> • 0.3 kilograms individual weight. • Display boxes come in a cardboard box of 6 pieces (19 cm x 18 cm x 9.5 cm) weighing approximately 1.8 kg.
500 millilitre Tub	<ul style="list-style-type: none"> • 0.5 kilograms individual weight. • Display boxes come in a cardboard box of 4 pieces (19 cm x 19 cm x 9.5 cm) weighing approximately 2.2 kg.

Which Size?

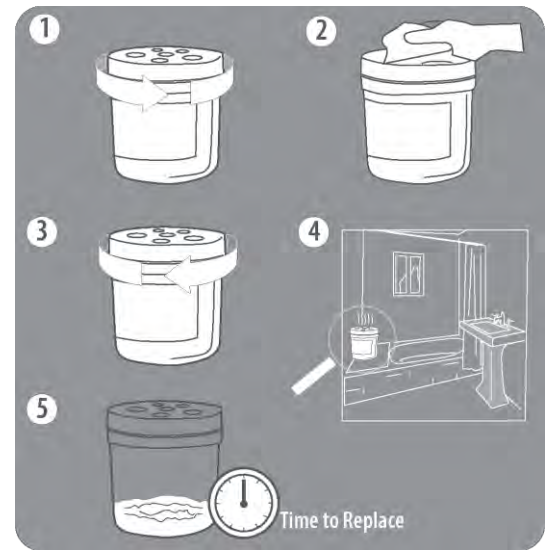

The following should be used as *general* guidance in selecting the correct sized Gelair™ Tub.

Room Description	Suggested Gelair™ Tub Size
Toilet	250 mL
Small Wardrobe / Children's Wardrobe	250 mL

2. Remove seal to expose the gel.
3. Replace lid.
4. Place Tub in required location, keeping out of reach of children and pets.
5. Replace as necessary.

- *Gelair™ Tub will last up to 12 weeks depending on air flow.*
- *The fresh Tea Tree or other fragrance aroma may be stronger immediately after installation.*

Health & Safety Information

Avoid prolonged contact of Tea Tree Oil with skin. Do not ingest. If swallowed, DO NOT induce vomiting. Seek immediate advice from Poisons Information Centre or a doctor. For further information, consult the Safety Data Sheet.

Tips

For high volume, high flow air conditioning systems, use Gelair™ Air Conditioning Block.
For Split or Reverse Cycle Air Conditioning Systems, use Gelair™ Health-e SPLIT.
For cars, use Gelair™ Health-e Car.
For general purpose sterilising and cleaning, use Gelair™ All Purpose Steriliser and Cleaner.
For built-up grime in the air handling unit, use Gelair™ Coil and Duct Cleaner.
For serious mold infestations, treat first with Gelair™ Fogging Solution.
